**Subject:** Ferner's report

Popped back for half an hour – the report has arrived – quick glance opinion no attention to detail and obviously had not seen all the statements – once more no reference to Haslar staff statements or ambulance men or sight of Brewer's statements ( 7 pages) or Health Trust investigation notes - the police had them. I note my mother had her appendix out in 1933 – I remember it well – [Code A] – the appendix was taken out four years later while she was [Code A] – I remember it very well . I told the milkman my mother had a very bad tummy ache through the open window of a downstairs flat– he called a neighbour who called the ambulance and I saw my mother taken out on a stretcher – I had lunch at the neighbour's house – liver hidden in mashed potato as I did not like liver and stringy barely cooked green beans and my grandmother came down from Ilford to pick me up in the afternoon - I was under four years of age – I have always been known for an extraordinary detailed memory. The neighbour's daughter Gwen helped me to dress when the ambulance departed as I had difficulty doing up the buttons on an old fashioned liberty bodice.

There are some extraordinary misconceptions by Ferner and I will have to go through in fine detail – unfortunately I am off for the rest of the weekend and back to Guys on Tuesday. My first impression is that he has not been made aware of all the details not only given to Burt but also long taped interviews later. They were never transcribed as far as I know. When did Ferner see my statement and also those of Lesley – my mother was perfectly capable of swallowing until she was rendered unconscious. Has he seen all of the Haslar file re. fluid intake and eating normally i.e. not pureed food . Barton's notes I have always alleged were written up retrospectively and of course he is unaware of the two injections of diamorphine given by Beed on the 17<sup>th</sup>. witnessed by Lesley and myself – not written up on file but I assume drawn from the diamorphine prescribed and written up on file on admittance 11 August but not initialled. Ferner makes no reference to the discharge note from Haslar dated 17 August only to that of the 10<sup>th</sup>. typed up on the Sunday evening ready for discharge on Monday morning after confirmation by Consultant at Haslar. Do not send him Livesley's report until you have my detailed comments. Note Livesley's comments re. licensing of drugs in a syringe driver etc. including confirmation from Manufacturers. I think you should obtain a copy of the Statement which the GMC had - I refused to sign their first offering as it was complete gibberish and I insisted I saw a partner at Field Waterhouse instead of the qualified solicitor who was not good enough to be a trainee paralegal. Gillian PS you may notice I insist on the t's crossed and the i's dotted.

It is not surprising that Horsley's request for a Public Inquiry was turned down with Kernaghan as the commissioner for standards at the House of Lords || I understand that Kernaghan is not a Freemason unlike Viggers who was very much against an inquiry and defamed me in the House of Commons ( under privilege and reported in Hansard.)
