Royal Naval Hospital,
Haslar,
Gosport.

CONSULTANT ADVISER
IN OTO-RHINO-LARYNGOLOGY
2 NOV 1984
R.N. HOSPITAL
HASLAR

Dear Surgeon Commander Counter,

Re: Mr. Robert WILSON,

Code A

Code A

I would be grateful if you would see this ex-Chief Petty Officer who, since leaving the Navy, has worked for ten years as a Wood Machinist. He admits to not using the hearing protection which his Company provide all the time. He has noticed increasing deafness over the last two to three years and this has been much worse over the last six months, particularly his left ear.

On examination, he had little wax in his ears. The drums looked relatively normal and Rinne and Weber tests were both normal.

I wonder perhaps whether he should have an audiogram and I should be grateful for your opinion.

Yours sincerely,

Code A

Dr. Valerie Cogger.
