

INTERROGATION (Freda Shaw)

1998, E grade Staff Nurse

Para 2: Not heard of Wessex Protocol !!!!!!!!!!! (Nor had Hamblin)

Para 3,4,5: Would you say you had sufficient knowledge and training to be fully competent in the use of syringe-drivers?

Para 6: Do you know why the policy of administering drugs was changed, and how is it different???

Para 10: As ADBC's named nurse, can you remember me?

Para 12: You appear to have carried out an assessment of his condition the day AFTER admission, although you also saw him on 21 Sep (Para 20), and assessed him as being totally dependent (Zero Score). Was he conscious at the time??

Para 21: You dressed his sacral sores with Paranet with Allevyn. Is this the same as Ascebine Cream (prescribed by Dr Lord)?

Para 23/24: When would the dressing next be changed??? (24th and 25th ??)

Para 28: You say you administered drugs on 25 Sep, were there other occasions?? (in fact, also on 22nd and 23rd)

When was it apparent to you that he was incapable of swallowing?

How is a patient hydrated in such circumstances?

Why wasn't ADBC given a saline drip at any stage?

Were you aware that ADBC had told Dr Lord that HE WISHED TO DIE? (If yes, ask WHY the family were not informed)

Have you ever heard of Dryad Ward called THE DEATH WARD??

How many patients who went into this ward, ever CAME OUT???
