Dear Wendy

Arthur Brian CUNNINGHAM : dob 12.3.19
Alverstoke House Nursing Home, Somervell Close, GOSPORT

Mr Cunningham - who is a bit of a saga from the Day Hospital - I was contacted by Dolphin to say that he was having problems with myeloproliferative disorder with a reduced platelet count and they wondered whether Sertraline was going to be the best option for this. I spoke to someone in the Drug Information Service at St Mary's yesterday, 9 July, asking them for their advice and they are supposed to be phoning me back. I wonder, if there have been no messages by Monday afternoon sometime, if you could phone them and remind them. I have also asked that if Sertraline is not best indicated then please could they let us know which would be our best alternative.

Many thanks.

Yours sincerely

Dr V A Banks
Consultant in Old Age Psychiatry
(Dictated by Dr Banks but signed in her absence.)
