

DR LORD'S CLINIC - 12.3.98.

AL/VB, **Code A**

Dr S R E Morgan
141 Privett Road
Gosport

16 March 1998

603253

Dear Dr Morgan

Code A

Arthur CUNNINGHAM

Code A

Mr Cunningham's renal and liver function, serum calcium, albumin remain normal. His glucose is 5.9 mmol/L. His haemoglobin is 14.9 g/dl with an MCV of 93.2 fl. However, he has a slightly low WBC at $3.4 \times 10^9/l$, and a slightly low platelet count of $127 \times 10^9/l$. The significance of this is not very clear, but I would be grateful if you could please arrange for a repeat full blood count in 2-3 months time. If his white cells and/or platelets have dropped further please refer him direct to a Haematologist for further investigation.

Further follow up with me has not been arranged.

With best wishes,

Yours sincerely

DR A LORD
Consultant Physician in Geriatrics
