Dear John,

Re: Mr. Arthur CUNNINGHAM. D.O.B. 12.03.19. 4

Code A

Code A

Mr. Cunningham's blood pressure runs just slightly above ideal despite cutting down on salt and trying to control weight. He does not drink excessively. Today it was 190/100 standing. In view of his diabetes I felt we probably should treat this so I have started him on Enalapril 2.5mg daily. We will check his electrolytes in 2-3 weeks.

With kind regards.

Yours sincerely,

Dr. R. Logan.
Consultant Geriatrician.
Dolphin Day Hospital.
