

April 11th. Foot pain in hip - to Hasker - No banding  
by 4pm. 5 days before see  
from family. Rollin very poorly. 5 days later  
a secondary holdin by side. Logue's of CP to see  
daily. 5 days late very poorly. Copious mucus-  
gumousy humor. Pending to the addition of strep.  
each week. Two days later developed cough  
washed in bath. Only who see had the hair dresser  
white wate hair. On enquiry found hair had been  
wet during a swim this find sitting in longe  
while occurring a wailing.  
April 11. On visiting at home this find sitting in longe  
bedroom from N. Home to increase his medication, as  
quale they don't do anything for this nowadays.  
Head. Foot swelling this. Rollin during sitting side. No X-ray as

June 7 months for venereal - no reaction.  
Hearing aids (both ears) lost yet again. Frequent earaches  
white gr. to dress this illus. Rollins speech affected.  
He decided to strengthen following consultation visit. Appoint  
massaging and holding my head. Pain in shoulder  
visits. Still suppose I had w been ill. Rollin continually  
place building. No pain chest. Found in normal daily  
days 97. Just off Cervilomas. Heavy foul. white sputum

accident from which I made it to class.  
out the past seven months culminating in the lesser  
The following is a catalogue of unacceptable sounds  
from. The least of course is no lung acceptable to me.  
would not be returning to the Nursing Home she came  
why I had stayed here if and when my Rollin returned she  
was asked my admission to Hasker - I was asked by the Social Service Dept  
Following my Rollin admission to Hasker while a fracture

leg. Gladys loose threads.

Very shocked. Night time Discharged back to home Family visiting for lunch & supper daily and sometimes for breakfast. Good days & bad days Glasses lost Staff requested to look for them please. No result. Mother deaf in both ears is now existing with no form of communication other than staff shouting at her and now without her glasses (post cataract opn) so she cannot see properly. She is almost blind in the other eye from another cataract.

April 22nd. Collapse in dining room. Telephoned from home to come. Mother unconscious. Home don't know what happened. "Collapsed" at dining table and post to bed.

Family nursed mother day and night for the next approx 10 days as staff stated they could not watch her. Mother regained consciousness but was very poorly. She remained confined. Attempting to get out of bed or chair if she needed the toilet. Staff again stated they could not watch her. She was very ill and remained in her room. I stayed during the day - my sister slept in the room during the night. When mother wandered the too during the night - although the bell was rung - my sister stated staff did not respond and my sister telephoned my mother. There were no falls during the period we stayed.

23. Told by staff that my mother had been 'lost' for over an hour at night and finally found down the back stairs. Told by staff mother wanders - always around 2am. - All she needs is walking to the toilet and settling back to bed. Decision made to have ground floor room.

hesley visiting daily throughout this period for lunch & supper most days - but away for supper.

16th July. Fall at 7.45 am. Getting up to go to loo on her own. Cut to bridge of nose and forehead grazing large facial swelling. To Hasbrouck. I went with her. X-rays and head scan done. Back to N. Home 1.30pm.

Visited and fed daily.

17th July Electronic pad put by bedside to alert staff if Mother got out. Frequently found to be unplugged.

Told by other relatives that Mother was left in lounge till 10.45pm.

I stayed to stay later after I had fed her supper.

21st July. Phoned 10am to say I could not visit today 3pm My siserv visited about 10.45-11am. Asked where Mother was. Told she has put herself back to bed. Found to be on the bed Head against the wall sideways on. Foetal position across the bed. Still no visit from GP following fall.

23rd July. Asked for help following supper to put Mother to bed. She had been very restless daily since 16th and I no longer could manage her without help. Shirley RGN said she would send a car to help me when she could. At 8.15pm Diane came to help me. ~~Put~~ Mother put on the toilet and washed and undressed and nighie put on. Taken to bed - set on bed and legs lifted to bed to take tights off. Nurse <sup>classy</sup> and I removed her tights which were clean to discover dried hard faeces covering sole of foot and up between each toe to the front surface of her foot. A warm soapy flame removed the faeces and the RGN in charge was informed in front of staff in the office for handover.

24E. Spoke to care assistant Jackie who had gone up the previous day. She stated she must step in it during the day. This is not feasible as there was no div or slippers or tights. I suggest she was not checked in the morning.

July. Mother taken to the toilet by me. Found to be red on her buttocks with very small skin off area. I opened door from toilet and asked care ass't for a clean pad and whatever cream is used here for sore buttocks. I was given a large container of E.45. I explained I did not want a moisturiser for a moist area. She said I'm only a care ass't, I don't know! I saw Sue RN through the door. Request repeated. Mother still standing by the toilet distressed at waiting. Sue brought E.45. Explained again. Sue said You'll have to wait if you want something else I'm busy. I waited. I washed mother and put clean pad on and walked her back to the lounge. Sue came 20 mins later, saying "stores" are now due till tomorrow but I have put some diaperine into a small pot for mother's use. I asked the care ass't I saw to please apply some to the sore area when they next took her to the toilet.

Next day I told Margaret RN about the small area broken.

3 days later I asked Margaret how was their bottom. She replied I don't know I haven't seen it yet.

My daily visits continued.

My mother still without hearing aids or glasses and I am told that the Hearing Aid Dept have no priority for those over 90. Mum is 91 - but she was 90 when they were lost.

Wed 29th July.

Could not get to the N. Home for lunchtime feeding as I was at the Leedcliff in The Avenue feeding another Grandma as my daughter was away. Rang home to tell them I'd be in later.

I arrived at 3.50pm. Mother was laying in her arm chair - anxious expression. I asked a care assistant to help me sit Mother up. We did so with difficulty and my Mother screamed out. I saw John Perkins RGN Hatton/Hanage in the hos doorway. I asked if there was anything wrong with Mother - Is she OK. She's fine he said. I explained I would not be here to feed her at 5pm as I had to get to Southampton Airport. Flug had delayed flights from Guernsey so my timing was out. I left at 4.15. I arrived back home at 6.10pm. Message on my answerphone at 3.28pm from Margaret RGN. Your Mother had a little fall earlier. She is alright but a bit noisy and upset. I know you come at teatime but could you come earlier and sit with her.

6.15pm I rang the Home. I spoke to John Perkins RGN. I asked about the message. I said I've seen you since the message and spoken to you.

Yes he said, but I did not know about your Mum's fall till it was mentioned at the 6pm handover when Margaret went off duty. Well how is she I asked. - well she is OK now he said.

Right I said my daughter has a meeting in Faversham 8pm. I'll call when I get back from the house. I got back at 8.30pm. 3 messages on my answer phone.

① 8.08pm John. Your mother is quite agitated/noisy perhaps you would like to come & sit with her.

- 2) 8.29. Mother is calling as if she may have pain  
We have put her to bed I may call the Doctor.
- 3) TVs Sue here - night staff. I'm sorry but I'm  
sure you're mother has a fractured femur. When  
I came on John said Go and see Gladys -  
she has been shivering for ages and when I  
saw her it was obvious. I've called an  
ambulance.

I rang back and said I'd meet the  
ambulance at Haslau.

On admission the X-rays were consistent with having been  
walked since fall. There was shortening of limb with external rotation  
of foot.  
Despite the injuries and the trauma - things are  
even worse because of her inability to bear.  
The frustrations of X-ray - Drips - Keeping still  
etc have been exhausting for all concerned  
and not least them who could not bear and cried  
and waited in fear.

As a family we have wanted to move Mum  
for some considerable time and have discussed this  
but felt the move would be unfair as she knew  
her surroundings and where things and rooms where  
she was familiar on a day to day basis.

I asked for a full explanation from Glen Heathers  
for the 29th.

We had a interview with Pauline RGN, Consultant  
Advisor to Glen Heathers  
Several statements from staff were read out to  
us.

They confirmed

The fall was at 2.50pm.

It was in the dining room.

What was she doing in the dining room at this time following 12 noon lunch? No answer.

Frequently those sitting quietly at the table are left in this room. If Mum was left - she would have attempted to get up to go to the loo.

The statements show she was walked to the lounge  
 " " " " " " " " to the bedroom from the lounge.

I do not know what time this was.

A Dr was not called.

Fall at 2.50pm.

To Master at 9pm.

Walked twice in the meantime.

(There are numerous incidents I could relate.  
 RGN raised voices. Care shouting at residents  
 Call system going for ages.

Hollis named others as other residents

Drawers full of other peoples clothes

In 10 days following Hollis' collapse in April John did not visit the room once.

Constant requests for hearing aids made me feel comiserate  
 I could go on).

The above events are a true statement
