	my question was t	hat, having settled on a particular drug regime
	why was no consid	deration given to, to reducing that dose, just to

At, I've just erm, come to, there's an entry in the contact record by Staff Nurse JOYCE at eight o'clock on the 18<sup>th</sup>, which was the,

	DS Code A	So, is it safe to assume that is an inevitability?

	DS Code A	At one point she's going to die?
	BEED	Yeah, yeah.

	BEED	Er, Doctor BARTON had er, er, stated she died of

	DS Code A	Right, Did, did the sisters agree with that?
	BEED	Er, in the statements that I have seen then they haven't but of

		the, the drugs which we are using to control her pain, keep her
		comfortable, would have masked a lot of the symptoms of a chest

	DC Code A	Can I just ask a question? So, I mean the decision is made on the

	BEED	At that point, no.
	DC Code A	But later on, which is, I mean is that caused by the drugs she's on?

BEED Er that she was dying of. DC Code A Can you, can you just go over those? BEED Just that she was very frail, that she wasn't eating, she had been very reluctant to eat and drink, she was in pain which wasn't controllable er and that she wasn't able to mobilize or, or doing anything to meet her own needs. DC Okay. Code A DS If I went into hospital, as fit and healthy as I hope to be, and were put immediately on a syringe-driver, with that combination of drugs, would I die? BEED No. I don't think so. Er but you wouldn't, you wouldn't go on that if you were fit and healthy. DS Code A (Laughter) I know. But, if I were to put another ninety-one year old woman without any, I mean would that kill her? BEED No. Patients have been on this, these levels of sort of pain control and sedation er we've upped conditions and have gone on to recover so, no, not necessarily.

So someone who there, there's a consideration that they may well recover that would not be a combination?

No, you, you would, may use one or more of those drugs but

ji ji	DS Code A	My sister, so, Mrs MacKENZIE.
	BEED	Yeah, I remember Mrs MacKENZIE um, asking about euthanasia
-		um and of course I advised her that that's not something what we
-1		would ever contemplate or consider. Its, its not er something we
		can do and not something we would do.
	DS Code A	What's the difference between euthanasia and palliative care?
	BEED	Palliative care is when we recognize that someone's dying um and
		the care we are providing is to make that death um a comfortable
		and dignified experience and meet someone's nursing needs. Um,
		euthanasia is, euthanasia as I understand it is actually actively um
•		assisting someone in dying.
	DS Code A	Yeah. One thing we haven't covered. I am drawing to a close
		now, is a suggestion of a massive haematoma. Do you recall this
		or
	BEED	Dr. PETERS, who was the G.P. who looked at the xray um said
		that he felt the cause of the pain was a massive haematoma. Um,
		as I understand it that's um, bruising as a result of the dislocation
•		and the manipulation to put it back in. Um and, and that could be
		quite painful. I think Mrs RICHARDS' level of pain, to me

seemed to be much more than just a haematoma, she, she was in a awful lot of uncontrollable pain, and distressed from the pain as well, but, but cos I expect anyone, and we have seen patients have dislocations put back it and they do have bruising and some discomfort but not on the level that Mrs RICHARDS was experiencing yeah.

Okay. Just somebody has written down a question here which I am not quite sure is appropriate is why was Mrs RICHARDS not given fluids subcutaneously during the period 18<sup>th</sup>, 19<sup>th</sup> and 20<sup>th</sup>? Well then.. it wasn't...

BEED

That's, that's because we, we don't feel that's an appropriate course of action with palliative care and that it doesn't make anyone any, it doesn't change the outcome. Um, it makes them uncomfortable cos the fluids don't get absorbed properly, they, they collect under the skin and don't get absorbed and um, you're just, just adding another intervention which is making a patient uncomfortable um and isn't changing what's actually happening. Am I right in saying that, at that time, the hospital wasn't licensed

		to, or authorize to, provide fluids through a subcutaneous route?
	BEED	We, we, no we could give fluids subcutaneously. What we
		couldn't do is give fluids intravenously and um that's cos we
		haven't got a doctor on site who could re.re-establish ar
		intravenous line.
	DC Code A	Right.
	BEED	Subcutaneously is, is an alternative route at giving fluids and
		that's, that's what we can
	DC Code A	And you always been, as far as you are aware
	BEED	Always been able to give subcutaneous fluids and that doesn'
•		need a doctor to set it up, the nursing staff can actually establish
		subcutaneous fluids, so we could have, if, if, if it had been
		appropriate to Mrs RICHARDS care we could have established
		subcutaneous fluids er and run them.
	DS Code A	Phil, what I intend to do in a second is, is to, to kill the tape, ru
		upstairs just to see if there is any other points that I may hav
		missed that they feel need covering, but I am getting to the point

	DS Code A	I think, I think that's explained if, if explanation is the right word,

One last thing for me, is, is a point that is raised by Mrs LACK in her statement where, and if I read the paragraph out it is on Page 13, she says I told Dr. BARTON and the Ward Manager that I'd been to Haslar that morning and explained what happened and told them that Haslar would be prepared to re-admit my mother.
