Lord.

Code A

Inh. 27/9/2000.

Consultant Genahricia 8½ yrs

confidence in Dr Barton who she described as dependable and sensible.

Syringe driver better for continuous control depends on clinical judgment as to what drugs are prescribed

Appears that inh palliative care (ie the begin of the end + aim to keep someone as comfortable as possible)

Doesn't think drugs would have been direct cause of death. Chest infection always a risk with people sedated

Transfer or movement can have a significantly detrimental effect on a patient

Drugs could cause respiratory problems

Midazolam is not licensed for substance use but it is good practice to use it.

Clinical Impression from notes & discussion that Mrs R was dying.

Code A

Code A

Int. 4 July 2000.

Health care support worker for 10 year (24m
 on Dardubs Ward.)
 fall from chair.

Code A

Code A

Int. 18/7/2000.

Pharmacist

Drugs are all stock items used routinely
 in palliative care.

Does not encourage use of syringe driver or
 amount of drugs.

Midazolam not licensed for subcutaneous use
 but accepted throughout the UK that it is so used.

Health Care Support Worker

Jeanette Florio (18 July 2000)
 Qualified 1992 RGN

Poorly & frail & in her opinion
 from 18th she was dying

Julia Griffin.

Code A

Ink. 19/6/2000.

Staff nurse. since 1972.

Her percept of Mrs R ~~and~~ was that she was someone who was dying and it was a way of making her death as pain free & comfortable as possible.

Problem with giving drink + food. (chole + inability to absorb)

No concerns over treatment.

Catherine Mayoran.

Code A

Ink. 20/6/2000.

Trained nurse. since 1967.

No criticism.

23/6/2000

Health ^{care} support worker
 recalls Mrs R was 91 very frail / ^{sense} demented
 Mrs R had best of treatment
 Mrs MacLenzie left on good terms.

Ambulance apologised for not having a canvas
 Saw Mrs R on 20/8 she was very poorly
 In LB's opinion she was dying

Daughter did not complain about syringe drive.
 De Barle is a caring kind sensitive doctor

Code A

Health Care support worker.

Brewer

Code A

lnh. 30/6/2000

E Grade staff nurse. (35 yrs exper
 10 year in elderly care).

Mrs R severely demented + v frail
 Halted her in bed but gave in to daughter
 & put her in chair from which she fell

" I think that Mrs R got the best
 care we could have given her, I feel
 that she fell on the floor or was on
 the floor because she wasn't safe in
 the chair and I feel that some of
 our work was disrupted by the
 daughter's view of her mother's condition."

De B had the welfare of the patient
 as the highest priority.
