Re Jane Barton case, just to let you know .

I have had a reply from Mr Farthing who is clearly not happy. I will draft a suitable reply next week and run this by you. This is not a complaint about my letter but a request for more review and further information which I am not in a position to do

H

Dear Hilary,

We spoke today about your cases and the position is as follows:

Tetty and Basildon Hospital	You have a sort of early advice file, comprising the report to the coroner and a few other bits and pieces but nto a full file. You will check and see what is on the monthly report about the file.
Barton	to be closed on 3 December if nothing further heard
Op Jackent	Con on 8/11. You practically have a full file and this will be a full review but the likely outcome is to return it to Area to deal with neglect charges
SW Highway Ltd	There was a previous near-miss in similar circumstances so you are concerned the case is carefully loood at but it is not likely to be going anywhere
Op Twyford	Awaits any interview of the employee Carol who took the pictures
Op deer	progress expected mid-November
North Middx (Op Hodges)	This seems to have been prematurely transferred to you. According to Rene's monthly report, nothing has happened since August. I'll speak to him about whether this needs chasing up (which I rather think it does)
Chikhalia & Mackenzie	Expert report expected mid-November
Pengelly Farms	A possible charge – full review awaits receipt of the last piece of evidence
Hijazi	You have now received the final statement from the hospital so this is ready for review, following discussion with Gaon

You have also been helping Gaon with Shillingford.

I had another look for your PDP – it shows up only when you go into the report in edit mode for some reason. At the moment, it's a bit brief, so could you have a think and let me have a draft before our next 1-2-1. One suggestion is to help Piers with CMS?

Many thanks

Sally
