Importance: High

Hello Gaon

As my mentor you have the dubious pleasure of considering these littery contributions.

The case is a bit of a saga-to say the least.
There is a FOI adverse finding already regarding the loss of the police evidential file.

I hope you can pick up the gist from what is written. In reality MH tells me this is all super sensitive as there is now likely to be a public inquiry (if you believe the independent)

I attach my brief report together with the Baker Review and the final decision letter from 2010 in case you need the background.

I have to say I can see nothing in this report which would justify withholding publication for so many years but I am relatively politically naïve..

Please note that no acknowledgement has been sent yet to Mr Farthing, I was hoping to get this out by the end of the week but if you think that is not going to happen then I will compile something suitable.

Incidentally MH looked at what I was doing in this case and approves in terms of the approach, it is not a standard process I gather!
H
