## Private and Confidential

Dear Keith

Sorry not to have finalised the report based on the recent case note review yet - I've been sidetracked by another investigation I'm afraid! Will work on it in the next week.

I have attached a short section based on the general prescribing and clinical management issues both you and Gary Ford raised in your expert witness reports for the police - for inclusion in the CHI report. (in italics) I have cleared with John James as "owner" of the report, but wanted to run both principle and content by both you and Gary first.

Feel the CHI report lacks something without summarising the severity of your concerns, but understand the purpose of your reports were to inform a police investigation, rather than a public CHI report.

August

Would be grateful if you could get any comments to me in the next week - happy to discuss.

Regards

Julie Miller
