Thinks care of patients on ward is excellent but sometimes they are very busy and work has to be prioritised. They do get additional staffing sometimes when necessary. All nurses give their best and there is good team spirit-staff help each other

it is seen as very happy on wards and sorry to leave, but feels hassle to develop skills because of case-mix of patients on ward. Thinks too many patients are wrongly placed, having acute hospital health problems. (Anxiety dementia) feels these patients should go to EMI wards.
