

Procedure for the Initial Management of Medical Emergencies in GWMH

Procedural Flowchart

Dial 6666 and state Emergency and Help required (i.e. 999 and bleepholder)

Switchboard alert bleep holder and/or Rings 999

Team Response Team Member 1} Maintain BLS Team Member 2} Bleep holder/doctor initiate AED

Patient Management

Safe/Transfer

Communicate to Family Relatives

Complete Post-Event Documentation

Definitions

A medical Emergency is a sudden deterioration in a persons physical function which requires any aspect of Basic Life Support (BLS).

Basic Life Support (BLS) includes calling for help, assessment of the victim (Airway, Breathing, Circulation) and management of victim, at all times maintaining a safe environment for rescuer and victim.
