

QUALITY REPORT - CLINICAL GOVERNANCE INDICATORS: Quarter ending 31 December 1999

1. Risk Events

The CareKey system is very powerful and the data it produces is very detailed and complex. Detailed reports by service, type of incident and severity are produced for the quarterly divisional review reports and quarterly for the Risk Management Group. Similar reports, focusing on clinical incidents, will be produced in future quarters, for the Clinical Governance Panel. At a future workshop, the Trust Board will consider what the most effective risk events key performance indicators might be. Trust Board Members have been provided with a summary of all risk events to staff and clients, recorded during the quarter.

2. Clinical Audit

The following clinical audit projects were completed this quarter:

- * Practice Designated Physiotherapy Scheme Physiotherapy
- * Patient Transport Trust Management
- * Family Health Review Child Health
- * Re-audit of the use of Depot Neuroleptics Elderly Mental Health

3. Complaints

♦ Response Analysis

Quarter	Total Number of Complaints	Acknowledged within 2 working days	Response within 20 working days
Q3/99	22	67%	71%
Q2/99	29	93%	46%
Q1/99	19	80%	50%
Q4/98	17	73%	26%
Q3/98	26	100%	55%

Although the final response times improved this quarter, a number of delays occurred in acknowledgement of complaints, including: delay in communication between services and

Trust Central Office; delay from Portsmouth Hospitals Trust; one client originally said he did not want to make a formal complaint, and then changed his mind. All but two complaints were completed within five weeks and one complaint was still open at the time of report. A summary of all complaints received has separately been made available to the Trust Board.

Number of Complaints by Quarter

The downward trend of the past couple of years seems to be continuing, and quarter two saw a peak of activity during the last three years.

◆ Types of Complaint Received This quarter

Type of Complaint	Q1/99	Q2/99	Q3/99

Still awaiting decision			1 7

Two requests were refused because all that could reasonably be done had already been done; in both cases further clarification of information was given. One request was refused because the complainant stated he was seeking police action. Multiple problems/delays were experienced in obtaining lay chairs from the South East Regional Office.

4. Waiting Time for first OPD

The waiting time standard for the first outpatient appointment, following GP referral, is that 90% of people should be seen within 13 weeks, and 100% within 26 weeks; children should be seen within 6 weeks. The estimated exceptions to these standards (based on next available appointment) at 31 December 1999 were:
