Dear Fiona Cameron,

Thankyou for the letter you sent me with regard to the late

Code A

After consultation with my sister we now would like our mothers records upon admishion to St. Marys Hospital looked at, we feel that this will highlight that the care provided on Sultan ward, Gosport War Memorial Hospital was not adequate.

Please could you explain why our mothers condition was as it was on admishion to St Marys Hospital.

Does Kidney failure, liver failure, dehydration, Poison in the blood stream all happen in the time it takes to transfer a patient from one hospital to another? How did this all go unnoticed while our mother was under the care of Sultan ward)

We desparatly tried to get our mother moved as we could see she was getting worse. NOBODY listened to us,

Yours Sincerely
