If you look at Prof. Ford's interpretation of drugs on Daedalus Ward (page 6) – there is quite a difference in interpretation. I have queried time and time again the dosages of oramorph on the 17<sup>th</sup>. Agree oramorph 17<sup>th</sup>. August at 1300 – the next doses were not given at ? 1645 and 2030 – she was out for the count with oramorph at 1300 and two injections of diamorphine given before going down to X ray still conscious and talking but lost consciousness in the X Ray. – Beed was covering himself by filling in as oramorph – you do not inject oramorph. If Lesley wakes up she must admit to that. Gillian .
