30/7/98 Operation

Recovering

One week later very well

11/8/98 - transfer date to GUM.

Mum was there when Gran arrived
by 'sitting ambulance' → wheelchair *

5/8/98 - Hawlar Referral note Gran

seen 3/8/98 -

should be given all opp to
mobilise and ultimately be
placed elsewhere (after rehab)

Dr Barton's notes

Gran was mobilised with two helpers
and Zimmer

11/8 - Mum did not see Dr Barton.

Mum told by nurse better to leave
her to settle

12/8 ^{Mum} saw her next day

Notes: not obviously in pain

12/8 The next day:

Gwm was "unrousable" / out of it
 Mum asked what had happened - unconscious

Not been on morphine previously

to her knowledge

Mum asked what been given "ora morph"

Was not having food at that stage
 no drip was seen

late in evening mum gave her a bottle of juice - she drank the lot.

13/8 Karen visited

24hrs after a fall for ~~Hester~~^{Gwm}
 to transfer her back to Hasler

14/8 Grew back to Haslar
operated on with an hour

11 12 13 14 ora Morph

14-16/8 Recovered well at Haslar
until 17/8
Again up, standing
complex mentus

17/8 Registrar's note of ward
round
Fit for discharge
to remain in full splint
for 4 weeks

? on the road to recovery? "yes"
transferred back to GWM

17/8 Dr Bohon's notes
only give ora Morph if
in severe pain

Mum told midday

17/8
12.15 Gran was screening on arrival

No leg splint apparent
Mum ~~was~~ advised for a nurse to help change her position

Mum wanted Gran transferred back to Haslar

Haslar say we will have her back

Spoke to Philip. Dr Barton would speak to mum

Dr Barton said not appropriate to transfer her back.

2 injections (not recorded)

+ 4 doses of ora morph

1pm dose

11? choice

16.45 "

following morning

Mum says these drugs were given
after she was unconscious

she was never awake again

18/8 - diamorphine in syringe
driven with up

18/8 RT ward

PB told Mum Gwn had a bit
had good night.

It had been decided to
administered drugs via
this method

21/8 Remained unconscious

no hydration for 4 days

Death cert - 1A bronchial
pneumonia

period of months when Gran
 did not talk? - NO.

Referred to Dr Reid
 consulted for some years
 Xmas 1997 when she sustained
 a fall.

Dr Banks notes say her daughters
 said she had spoken for months.

Feb 1998:

Dr Banks severe dementia
 said "end stage"

Start nurse at Hasler
talking about Gwen's past medical
history did she agree?

Note 9/6/98 by Dr
reference to Lilly - Mum not seen before

9/7/98 notes again

19/8/98 - reference to a phone call
as Mum had complained about
her fall and level of sedation

Hasler gave her Morphine
Mum says only initially
? was she wrong in her recall

Morphine given for 3 days post
surgery

1st admission to ~~Hastler~~ GWM

11/8/09

Bartel score of 2 from Jane Barton
Nursing staff give a score of 3 on
that scale

During the admission we know
the records suggest she was
found on the floor on 13/8

No Dr contact at that time
X ray showed dislocation
the next day

transferred to Hastler - Jane Barton

Notes show op done. (Hastler)

Transferred Gran from ambulance on a sheet she stated and she could see she was in pain.

x 2 injections Phillip Beard administered

Gran needed more pain relief that day and into that evening

written up for 4 hourly but
x 5 doses over 7 hours

he suggested 4 hours as required' means as required not every 4 hours necessarily.

Arrived back at 11.48am

he suggests at some stage

JB ~~suggested~~ assessed her as

now appears peaceful

18/8 she was unconscious

18/8 J Baron notes
states she was still in
pain,

When they arrived P. Beard
told them about syringe
driver it was already in
place

17/8 they say x ray done
Dr Peters no dislocation seen
she does not remember an
x ray being done

18/8 renewed the next day
by Jane Baron and daughter
agreed to syringe driver

Was there an x ray

on 17/8?

17 X ray

Philip Bead - ward manager. They wondered why
 he said they didn't think she would get better.

Dr Bottom's name never mentioned & never met
 her. One day ²⁰¹⁸ AW was very sleepy and said she
 was in pain.

1.5pm

Philip Bead attended - told they would give

her something to relieve her pain -

8pm that evening she was totally

unconscious 20/8

never spoke to her

She was unhappy with the attitude of staff and

felt something not right

again died the following evening.

Philip Bead took her to go home

(she went home to eat & have shower)

she returned to the hospital PB rushed back

into her room and then told her - she had just

died.

note of 17/8 - daughter as speed syringe driver

is she is in pain - never mentioned to them at

all - s/d never mentioned.

so notes inaccurate & false do not truthfully account for what happened.

Dear Sir

To introduce myself - I am the natural daughter of Gladys Habel Richards - deceased 21st August 1998.

Under the freedom of information act I need to provide the date of two pages of evidence collated probably in 1998/1999 and given to me by

Detective Chief Inspector 7410 R. J. Burt - during the process of my making a witness statement.

I have been asked when I received these pages and when they were sourced.

The Police enquiry was Operation
Rochester. - but I do not believe
the first enquiry had a title in 1998/99

I would be grateful for your
help in this matter as I
urgently need the information well
before the inquest and I
cannot use the papers, unless
I can say when they were
sourced.

Papers concerned. - ref numbers.

I thank you in anticipation
of your help in this important
matter.
