

Mother's admission sheet 11. 8. 98. written by Dr Barton.
 states NOV in obvious pain yet oramorph is prescribed.
 Also "transfers with hoist" is not correct as she was transferring with help and use of Zimmer frame.
 Also statement "I am happy for nursing staff to confirm death. This for a patient referred for rehabilitation following surgery. Oramorph commenced on 11. 8. 98 and given on 11. 12. 13 & 14th of August. In this time I only saw her conscious twice, on 14th transferred back to Haslar following a fall 2 1/2 hrs earlier. Back in Haslar following Manipulation of hip joint Mother enjoys food & drink. No drugs or analgesia necessary or given. Able to converse. Conscious throughout her stay eating & drinking. Transfer back to C.W.H.H on 17th 08 98. Grand maddy Oramorph again given. Although prescribed 4 hourly she is given 4 doses in ^{seven} ~~7~~ hrs periods, ^{which are documented} plus 2 Intramuscular injections which are not recorded but were witnessed - all of which rendered her ^{continually} unconscious, - not able to have hydration or nourishment. My mother did not regain consciousness ^{again} but was in a coma induced state. She was again given oramorph twice on the 18th and a syringe drive with Diamorphine together with Haloperidol and Midazolam. were administered continually until her death - She was unable to have any nourishment and only her strong constitution and previous good diet allowed her to live until the 21st August. '98

I did not see my mother on her feet once, since admission, and she was in a drug induced coma continuously from 17 to 21st August.
