Dear Ann,

May I take this opportunity to thank you for a wonderful brief to us today. You certainly achieved, as far as I am concerned, trust in you and your team. The small details, like the cards, packs and notepads that Lisa magically produced were not unnoticed. As you may have sensed we are not together, *totally*, as a group. We have all been "led" by the pace of Gillian, who at the moment dominates the present situation. I'm sure you understand the difficulties we all face in coming to terms with distancing ourselves slightly from our own individual cases and proceeding further, acting as a team group. I feel at this early stage we would benefit from your experience and guidance in achieving this.

I visited Mike Wilson this afternoon and gave him a very brief summary of the meeting and your pack. His details are as follows:

Personal Details: Michael WILSON.
