Thank you for writing to me about this lady who has noticed a couple of lumps over the last 2 or 3 weeks. She has a history of CLL amongst other things. Last week she saw Mr Resouly who felt that there was nothing untoward going on in her throat.

On examination she has two quite firm 1 cm lymph nodes, one in her left axilla and one in her left supraclavicular fossa. I couldn't feel any elsewhere. I was able to get hold of Dr Green today and we both agreed it would be a good idea for one of them to come out and so I have arranged to do this next Wednesday on my day case list at St Marys.

With best wishes

Yours sincerely
