Dr. Knapman,
 The Surgery,
 148 Forton Road,
 GOSPORT,
 Hants.

Dear Dr. Knapman,

Re: Norma WINDSOR, Code A

Code A

Diagnosis: CLL
 Ischaemic heart disease

FBC: Hb. 13.6 g/dl. WBC 13.3, neutrophils 3.6, platelets 280

Mrs. Windsor attended the haematology clinic today for routine review. She has no symptoms related to her CLL, her blood count has been stable since November last year.

Her rash is controlled by Zirtek which she is continuing to take since the rash tends to flare up when she stops this treatment.

She has been offered coronary artery bypass surgery but seems reluctant. She is due to see you soon to discuss the pros and cons to help her with her decision making.

I have arranged to see her again in four months or earlier if need be.

Yours sincerely,

Code A

DR. T. G. CRANFIELD
