Your Ref

9th October 1978.

Dr. D. Colin-Jones.

Dr. H. Nicholls,  
 148 Forton Road,  
 Gosport.

Dear Dr. Nicholls,

Mrs. Norma WINDSOR

Code A

I am afraid that Mrs. Windsor continues to have quite severe symptoms of her duodenal ulcer disease. Despite full doses of Cimetidine she is still vomiting frequently and having a lot of epigastric pain. She has lost  $1\frac{1}{2}$  stone in weight since June and her appetite is very poor at present.

On examination she was very tender in the epigastrium although there was no gastric splash suggesting no flow obstruction. I discussed her problem with Dr. Colin-Jones and we have agreed that surgery is probably advisable. With this in mind I shall send a letter to Mr. Prout asking him to make an early appointment to see this patient in his clinic.

Yours sincerely,

JS
