Dear Harry,

Mrs. Norma WINDSOR Code A
Code A

This lady has recently been in the Q.A. for treatment of her duodenal ulcer. A straightforward vagotomy and pyloroplasty was performed 12.4.79. at which operation, no other intra-abdominal abnormality was found.

She made a good recovery from the operation apart from the expected chest infection - she has been a heavy smoker.

Not only did she make a good recovery from the operation but during this time she has become reconciled with her separated husband and to-day was on very much better form in this respect.

I will review her in Gosport in six months time.

Kind regards,

Yours sincerely,

Dr. H. Nicholls
Gosport.

Code A

W.G. PROUT
