Dr. Knapman,
 The Surgery,
 148 Forton Road,
 GOSPORT,
 Hants.

Dear Dr. Knapman,

Re: Norma WINDSOR, Code A
 Code A

Diagnosis: CLL

FBC: Hb. 13.4 g/dl, WBC 14.8, neutrophils 4.2, platelets 287.

Mrs. Windsor attended the haematology clinic today for routine review. She continues to suffer a blistering rash which comes and goes and has recently been biopsied. She has no symptoms related to her CLL.

On examination there is a small node in the right side of her neck but no other lymphadenopathy nor hepatosplenomegaly.

Her lymph nodes appear to have responded well to a short course of Chlorambucil given 9 months ago. She does not need treatment at present. We will see her again in three months or earlier if need be.

Yours sincerely,

Code A

DR. T. G. CRANFIELD
 Consultant Haematologist
