Query

Thank you for your e mail. May I have an answer referring to the statements from Haslar staff – I note that query has been ignored and I cannot find reference to those statements in the GMC hearing. Gillian M Mackenzie PS I am well aware of what went on during the interview with Dr. Barton by the police in the first instance and of course I am well ware of the evasive answers given by other Nurses. i.e. hydration was set up by drip etc after I had been to the Police and Dr. Reid was called in when a family member insisted that someone in authority saw his mother regarding another victim. This was Code A not to be mixed up with the Iain Wilson case – (Code A Code A case was also disregarded by the police ) he was threatened that he would be ejected from the Gosport War Memorial in the same way as my son was ( in the Richards case) when he appeared at the Gosport War Memorial on 18 19 20 August at approximately 11pm. He only saw the night Nurses and yet Philip Beed states he met my son – absolute rubbish. I did not attend every day at the hearing as my “partner” was dying from Cancer - (31 July 2009 ) I am amazed at the total muddle that went on mixing up patients etc. in cross examination, questions from the panel etc. I allege that the Nursing and Midwifery Council have not examined the GMC hearing notes or if they have their comprehension and lack of investigation is on a par with most of the “Authorities” . I have not gone along so far with the widely held belief that the whole saga of Gosport has been one cover-up from the beginning - I am beginning to come to the same conclusion – but it is not over yet. I repeat I want confirmation that you received statements from Haslar staff and an explanation why they were not mentioned at the GMC hearing. Gillian M Mackenzie
