Subject: Request from Code A

Contents:

T/call made to Code A of Hampshire Constabulary regarding the disclosure of information they have provided to us in respect of Dr Barton, specifically as a result of a request made by the solicitors of Code A the daughter of Code A Code A

I had previously emailed Code A a copy of a list of the documentation which had been requested and Code A had responded to me confirming that he could see no reason why these documents could not be released to the solicitors acting on behalf of Code A subject to the editing of these documents to remove references to other patients.

I rang Code A to specifically confirm that he was happy for the names of individual witnesses to be left on case papers when we disclosed witness statements or transcripts of the interviews police had with the nursing staff at Royal Hospital Haslar and Gosport War Memorial Hospital. Code A confirmed that he was happy with this approach. We agreed that details of those individual's work history however would be redacted prior to disclosure.

Code A also informed me that the inquest planned for 25 October 2011 into the death of Code A has been 'postponed indefinitely'.
