

# Expert Review

**Albert Hooper**

**No. BJC/27**

**Date of Birth:** Code A

**Date of Death:** 9 October 2000

Ded  
3/10/2000  
R.D.

Mr Hooper was living alone at his home at the time of his admission on 12 September 2000 at Gosport War Memorial Hospital.

Mr Hooper had previously been admitted to Royal Haslar Hospital on 18 August 2000 with Code A reduced Code A. He was transferred to Gosport War Memorial Hospital for rehabilitation and continuing care. The transfer form noted that Mr Hooper needed help with all aspects of Code A that he was occasionally Code A.

Code A Clinical notes made reference to his multiple medical problems including Code A.

Code A

Whilst an inpatient, Mr Hooper developed a Code A which was treated Code A in view of his deteriorating general condition. He was prescribed Code A to begin with and, as he continued to complain of Code A not relieved by Code A were introduced. The doses were doubled on his day of death because Mr Hooper remained uncomfortable whilst being suctioned.

The experts note that Mr Hooper received very reasonable care under the overall circumstances.

The experts did note that a combination of drugs may have contributed to Mr Hooper appearing sedated. Overall, the nursing input was also commended for appropriately identifying Mr Hooper's care needs and for maintaining good communication with Mr Hooper's family.
