# **GUIDANCE TO SENIOR INVESTIGATING OFFICERS**

A Policy File will be maintained by the Senior Investigating Officer in the case of all major crime investigation, e.g. Murders, Stranger Rapes. In cases of doubt the advice of a Detective Superintendent should be sought.

It is difficult to lay down hard and fast rules regarding decisions to be included. However, to assist users of this book A.C.P.O. Crime Committee guidelines are set out in the front of this book. These guidelines will form the basis of entries relating to policy.

Each decision will be entered on a separate page and all sections completed.

It is essential that all staff employed on the enquiry are aware of decisions made.

When being used in conjunction with a H.O.L.M.E.S. incident room the second page (copy) will be detached and passed to the Office Manager for indexing. In all other cases both copies will be retained in this book.

This file will be available for referral by officers engaged upon the enquiry. It is the duty of all Senior Investigating Officers to ensure policy decisions are brought to the attention of and understood by all officers engaged upon the enquiry.

## **INVESTIGATION SET-UP**

- 1. Appointment of Officer in Overall Command or Senior Investigating Officer.
- 2. Responsible Chief Constable(s).

Subject:

Kenny, Owen; Watts, Steve; Niven, Nigel RE: Relatives letter- GWMH

Mark

I am happy for you to send a letter in the first instance, but I think we should indicate that we will be speaking to each person who rang the helpline to establish their concerns. Please amend accordingly and let me see before you send thanks.

Owen

Can your team fit in visits to these people in between witness statements please. The priority is the witness statements already identified, these visits can be organised during down time. I do not want these relatives to think we are dismissing their concerns without even listening to what they have got to say. Obtain brief details of their concern, relatives identity, dates in hospital & death, etc., so we can locate medical notes later.

Thanks

Bob D

Subject: Relatives letter- GWMH

Sirs .... you are probably aware that DS Owen Kenny was in contact with me yesterday and has subsequently sent me details of a further 10 relatives who have been referred to the police by NHS Direct following the release of their public information line.

Having checked my lists, I can confirm that these are all new cases and have not previously corresponded with them.

My initial reaction is that it would be impractical to visit each of these relatives on a personal basis and probably not justified due to the fact that their knowledge of the police investigations to date will be limited and are probably not fully relevant to them at this stage of the proceedings.

I would therefore propose that I send them the below letter which I have prepared which I believe contains sufficient information to keep them informed as to where we are at present, whilst also supplying contact details should they wish to obtain further information from me.

I felt that this was really a policy decision which I needed to run past you and seek approval for ..... therefore await your thoughts and comments. -

Dear Sir / Madam

## **Gosport War Memorial Hospital**

I am writing to acknowledge receipt of your details which have been fowarded to me by a member of the NHS Direct team in relation to the above hospital.

In order to keep you updated with the current developments, the Hampshire Constabulary are continuing to work with other agencies following the recent emergence of some possible new evidence from within the Portsmouth Health Authority. It is the intention of the police to examine these new papers and to submit any subsequent new and relevant evidence to the Crown Prosecution Service (CPS). The CPS will consider evidence we have already submitted on a number of individual cases which were previously notified to us together with any newly available information.

Once the review has been conducted, consideration will be given as to whether or not a further police investigation is required. Any other cases which have now been highlihted to us, such as yours, will receive closer attention at that time. Obviously I am unable to give any indication as to how long this process is likely to take, but be assured that as soon as we have received a response from the Crown Prosecution Service we will of course be back in contact with you to discuss the matter.

In the meantime, could I ask that as the family liaison officer, you contact me direct should you require any further details at this stage, but ask that you also bear in mind that as we are currently dealing with a number of concerned people, it would be helpful if enquiries could be resticted to urgent matters only.

Thank you for bringing the matter to our attention and be assured of our professional committment in trying to resolve your obvious concerns that surround the circumstances of the death of your relative.

Yours sincerely

Insp Mark Wise Family Contact Officer

Duncan, Robert; Niven, Nigel; Wise, Mark

Subject:

Op Rochester

Gentlemen,

Thank you for our meeting this morning in respect of the ongoing issues regarding Op Rochester.

I am pleased to note that the lines of enquiry raised are progressing well and that the last witness in respect of the new papers will be interviewed on 7/11/02.

- 1. I note that approx 10 persons contacted us thru NHS Direct following the last media release. I agree that at this stage Officers visit those people and note their concerns.
- 2. Mark advised that we have an indication from those people with whom he had contact as to their concerns, Mark will continue contact with those people.
- 3. There was a small number of people, however who have contacted Mr Readhead direct whom we have not spoken to.
- A Mark Wise to make contact with those relatives and advise as to the conduct of the enquiry, to note their concerns and pass back to the MIR
- 4. Mark also indicated that a number of relatives have formed an action group and are represented by a Solicitor Ann ALEXANDER, it is understood that she was involved in the families of the Shipman enquiry and thus has experience of medical negligence issues.
- A Mark Wise to arrange a meeting with Ms ALEXANDER to include himself, DCS WATTS and preferably both DCI DUNCAN and DI NIVEN, or at least one of them. This meeting's objective to explain the conduct of this phase of the enquiry.
- 5. In discussion it was agreed that we are reaching the end of the first phase of this investigation, the provenance of the new papers having been proved, and witnesses named therein having been interviewed. Before moving on to interview others including Mr PIPER & Mr HORN, it is important to develop a robust strategy based upon the best legal and scientific advice to that end, the following is proposed;
- A DCS WATTS, DCI DUNCAN & DI NIVEN to meet with;
- a) Prof BAKER carrying out the statistical analysis of death rates at the request of the Chief Medical Officer-Objective; to ascertain his methodology and the implications for the investigation of the range of possible results of his examination.
- b) Mr Paul Close CPS Objective; to discuss the implications of various investigative strategies and to discuss sources of best evidence, together with the implications for the potential of criminal prosecutions.
- c) Prof Forrest NCOF expert in Forensic medicine Objective to discuss opportunities for gathering best evidence.

All above to be achieved if possible by the end of November 2002.

- 6. Following the above we will be in a position to consider additional lines of enquiry which may include interviewing all relatives who express concern and analysing the relevant medical records. It may alternatively or additionally be necessary to make a scientifically valid random selection of patients within defined parameters. At that time a decision will be taken as to the interview of Mr PIPER & Mr HORN and any necessity to re interview any person who has thus far been interviewed under caution.
- A DCC Mr READHEAD in his position as 'Gold' will be requested to inform Mr TANNER & Mr CRUDDACE of the NHS of the above.

Thank you for your hard work thus far.

Regards SW

20

# **OPERATION ROCHESTER**

#### **INTERVIEW STRATEGY**

This interview strategy is based on information provided by **Code A**Code A by way of a verbal briefing and transfer of documentation relevant to this enquiry.

This strategy will be agreed by the SIO and appended to the Policy Log. The information contained within this document should be treated as <u>highly sensitive</u> <u>material</u> and not disclosed to any person outside of the enquiry team without the prior permission of the SIO.

SIO DSUPT WATTS D/SIO DI NIVEN

#### **INFORMATION**

Operation Rochester is the investigation into a number patient deaths at the Gosport War Memorial Hospital. These patient deaths are suspected to be linked to a prescription and administration of opiate drugs.

#### **INTENTION**

To interview two persons namely Tony HORNE and Ian PIPER on Thursday 21st November 2002 at Fareham Police Station. These interviews will be conducted as witness interviews under caution. The purpose of the interview will be to obtain information concerning their status and responsibilities within the Gosport War Memorial Hospital during the relevant time period and to establish their knowledge of the item served as pre interview disclosure (JEP/GWMH/1/8) and the information contained within this document.

#### **METHOD**

The interviewees will be booked into Fareham custody as voluntary attendees in accordance P.A.C.E. They will be told that they are free to leave at any time and that they are not under arrest. (The custody staff at Fareham Police Station has been made aware of the planned interviews).

#### See Code C1A;

Although certain sections of this Code (e.g. Section 9- treatment of detained persons) apply specifically to people in custody at Police Stations, those there voluntarily to assist with an investigation should be treated with no less consideration (e.g. offered refreshments at appropriate times) and enjoy an absolute right to obtain legal advice or communicate with anyone outside of the Police Station.

The interviews will be recorded on tape and conducted in accordance with the Codes of Practice for Tape Recorded Interviews (CODE E) The interviews will be witness interviews under caution.

#### **CODE C 3.15**

Any person attending a Police Station voluntarily for the purpose of assisting with an investigation may leave at will unless placed under arrest. If it is decided that he should not be allowed to leave then he must be informed at once that he is under arrest and brought before the custody officer, who is responsible for ensuring that he is notified of his rights in the same way as other detained persons. If he is not placed under arrest but cautioned with Section 10, the officer who gives the caution must at the same time inform him that he is not under arrest, that he is not obliged to remain at the Police Station but if he remains at the Police Station he may obtain free and independent legal advice if he wishes. The officer shall point out the right to legal advice includes the right to speak with a Solicitor on the telephone and ask him if he wishes to do so.

#### **CODE C 3.16**

If a person who is attending the Police Station voluntarily (in accordance with paragraph 3.15) asks about his entitlement to legal advice, he shall be given a copy of the notice explaining the arrangements for obtaining legal advice.

Officers who are conversant with the P.E.A.C.E model and familiar with the enquiry will conduct the interview.

# Code A

D/SGT KENNY and the nominated Tactical Interview Advisor will monitor the interviews. The purpose of monitoring the interviews will be to raise any significant priority actions that may be pertinent to this enquiry.

The interview will be conducted in phases:

#### Phase one

Introduction and P.A.C.E. formalities (voluntary attendance) Confirmation of disclosure

#### Phase two

Invite comment from the interviewee regarding circumstances of attendance at Police Station and any comment they may wish to make in advance of the questioning phase of the interview.

#### Phase three

Exploration of professional cirrum vitae.

Educational and professional skills background.

Detail any Medical skills/knowledge

Positions held, (location, period etc) responsibilities and accountabilities whilst employed by the National Health Service.

Current position within the National Health Service.

#### Phase four

Explore knowledge of the documentation disclosed prior to interview.

Explore when they became aware of the documentation-was it at any time during the previous investigations?

Explore knowledge of the persons named within the documentation.

Explore knowledge of the issues raised within the documentation.

Explore knowledge of other persons who were aware of the documentation and or the contents of the documentation.

Explore what, if any action, they or (to their knowledge) others took as a consequence of knowledge of the information contained within this document.

#### Phase five

Conclusion of interview- summary of information gathered.

Invitation to interviewee to offer comment about matters that either they wish to clarify or wish to raise that have not been spoken about during the course of the interview.

# THERE WILL BE NO CHALLEGE PHASE DURING THE COURSE OF THESE WITNESS INTERVIEWS UNDER CAUTION

#### **ADMINISTRATION**

A copy of this Interview Strategy will be appended to the Policy log once it has been agreed by the SIO.

The interviewing officers will maintain the Hampshire Constabulary Investigators Notebooks and this will be submitted at the conclusion of the enquiry for the purpose of compliance with C.P.I.A.

The Nominated Tactical Interview Manager will be responsible for ensuring that the custody records opened by the custody Sergeant at Fareham are completed accurately.

#### PRE INTERVIEW DISCLOSURE

A copy of item reference JEP/GWMH/1/8 will be served on MR PIPER and Mr HORNE prior to interview on 21/11/02 and sufficient time will be given to allow time for a consultation with their legal representative prior to the commencement of any interview. This documentation will be required to be returned at the conclusion of the interview process.

#### **RISK ASSESSMENT**

A risk assessment has been completed and there is not considered to be any additional risk required to be catered for outside of the *Generic Risk Assessment* for policing duties. The HAZARD and RISK potential are considered to be low.

#### **COMMUNICATIONS**

The interviews will be monitored in the Detective Inspectors Office at Fareham Police Station. (641-150). This facility has been checked and is in working order.

The Enquiry team knows all personal mobile telephone numbers.

#### **HUMAN RIGHTS**

It is necessary and proportionate in the furtherance of this investigation to interview the persons named within this strategy and this interview is justified and a necessary medium of progressing this enquiry.

The rationale behind conducting witness interviews under caution is to ensure the admissibility of any evidence achieved during the course of the interviews.

Both Mr HORNE and Mr PIPER are believed to have held positions of responsibility within the National Health Service during the time period pertinent to this enquiry.

This interview strategy will be updated during the course of the Thursday 21/11/02.

Submitted for your consideration,

Janis Code A

Dr Tanner
Director of Public Health
Hampshire & I.O.W Health Authority
Oakley Road
Southampton

Dear Dr Tanner

#### Re: Gosport War Memorial Hospital

I am aware that you recently held a meeting which included DI Nigel Niven regarding your proposal to undertake an internal investigation into matters of concern at Gosport War Memorial Hospital, those matters coincide, as you know with issues under investigation by ourselves.

I have now had the opportunity to discuss in detail with Nigel the matters raised during your meeting.

I would like to restate that we are committed to working with you in this matter and will seek to maintain good lines of communication, so that you are aware of the conduct of the investigation.

Two principles are paramount in this scenario, firstly the safety of the public and of patients at Gosport War Memorial Hospital, and secondly, the integrity of a full and professional investigation into allegations of a criminal nature.

I would not wish to seek to prevent you undertaking measures to ensure the safety of patients, however I must be cautious in respect of any action that may have implications for the criminal investigation.

The view that I take in respect of any investigation that you would undertake has to be:-

- 1. If the investigation that you propose is aimed solely at ensuring that current processes, systems and working practices maximise patient safety, and not upon examining historical issues, then I am content that it may continue with minimal impact to the criminal investigation. We would, of course need to discuss with you the exact terms of reference, and receive an undertaking that any material which may relate to criminal issues be made available to our investigation.
- 2. If the investigation that you propose is intended to examine historical activities with a view to disciplinary matters, I would have very real fears that the criminal investigation would be compromised.

My concerns would center upon a fear that any account given by key individuals may be affected by an interview prior to one undertaken in accordance with the Police & Criminal Evidence Act. In addition, key individuals may be reluctant to give more than one account albeit the criminal investigation is clearly separate to disciplinary issues.

I would therefore not be able to support such an investigation until criminal investigative processes had concluded.

In any event, before you embarked upon an investigation, I would want to consult, and share any proposed terms of reference with the Crown Prosecution Service, Special Caseworker who is involved in this case.

I do hope that this is helpful in explaining my position in this regard. I would be grateful if you could indicate your proposals as soon as you feel able to do so.

Yours sincerely

Steve Watts MSC DPM MCIM Detective Chief Superintendent

**Briefing Note for Crown Prosecution Service (CPS)** 

Gosport War Memorial Hospital Independent Management Investigation

#### Status of the investigation

This is an internal NHS management investigation commissioned by Hampshire & Isle of Wight Strategic Health Authority, East Hampshire and Fareham & Gosport PCTs. The investigation has no statutory basis and will depend on the cooperation of past and present NHS staff. The outcome of the investigation will be reported in private to the Chief Executive of the Strategic Health Authority and the chairmen of the PCTs. In the fullness of time - and once all other investigations are completed - the outcome and conclusions of the management investigation will be made public. Michael Taylor and Ed Marsden - two experienced NHS managers - are conducting the investigation.

#### Aims and objectives

The aim of the investigation is to establish what NHS managers knew about the matter of diamorphine prescribing at Gosport War Memorial Hospital (GWMH) and what action (if any) they took. The investigation will seek to resolve the question of what Ian Piper and Tony Horne knew so as their employers can make a decision about their current re-deployment and whether there is a need for any disciplinary action. The investigation could potentially identify other staff against whom disciplinary action may have to be taken. This could include senior NHS staff who were in post during the period covered by the terms of reference.

The attached terms of reference set out the specific issues the investigation is expected to cover (see Annex A.) The time period covered by the investigation is from the late 1980s to 1998.

#### Methodology

To date the investigating team have carried out the following work:

- Reviewed a substantial number of documents from Portsmouth Health Care
  Trust and the former health authority. (These documents include board
  minutes, executive management team minutes, various policy documents as
  well as a substantial number of adverse incident forms.) Among this material
  are a number of papers that are relevant to the investigation.
- Initiated a second trawl for documentation, as there may be further material available that is relevant to the investigation. Emphasis will be given to establishing the managerial responsibility of individuals against job descriptions and developing standards of NHS management practice between

1988 and the end of 1990s. The standards that will need to be tested include: risk management, monitoring of clinical quality and dealing with concerns raised by hospital / community based staff.

- Set in train a literature search at the Department of Health library so as to be able to understand the policy and operational context of the NHS in the late 1980s.
- Conducted a small number of informal scene-setting discussions with individuals who have knowledge of the Hospital but whom are not associated directly with the matters under investigation at GWMH.
- Identified a list of potential witnesses that the investigating team would wish to interview. The list is attached at Annex B. (The intention is to share this list with Hampshire Constabulary and seek their consent to interviews going ahead prior to letters being sent to individuals.)
- Discussed the conduct of the interviews with the lawyer advising the Strategic Health Authority and the two PCTs.

#### **Outputs**

The investigating team will produce a written report for the Strategic Health Authority and the PCTs. The report will be presented to the chief executive and the two chairmen respectively. They are likely to limit circulation of the report to their own advisers e.g. lawyers.

#### Potential outcomes

The investigation could lead to a number of outcomes including:

- 'no case to answer' in respect of Ian Piper, Tony Horne and others;
- disciplinary action being taken against either one or both of these individuals;
- disciplinary action being taken against other as yet unidentified individuals.

#### **Timetable**

The investigation should take no more than a matter of months to complete. An initial estimate is that the investigation should be concluded by March 2003.

Michael Taylor 19 December 2002 Ed Marsden

#### **Terms of Reference**

#### To seek to establish:

- whether or not any concerns were raised about any of the following:
  - the use of diamorphine [or any other opiate substance]; or
  - prescribing regimes; or
  - the use of syringe drivers to administer medication;

in relation to the treatment of patients at Gosport War Memorial Hospital ("the Hospital") at any time between 1988 and 1998;

- If so, the way in which any such concerns were raised, by whom, to whom and when;
- What action (if any) was taken (and by whom) as a result of any such concerns and when;
- The effect (if any) that any action taken had, on any of:
  - the use of diamorphine [or any other opiate substance]; or
  - prescribing regimes; or
  - the use of syringe drivers to administer medication;

within the Hospital in that period.

- Whether any action taken at the time was justified, in all the relevant circumstances;
- Whether any failure or omission to act at the time was justified in all the relevant circumstances;
- Whether any events at the Hospital (such as but not limited to patient deaths, untoward incident reports or complaints) during the period in question should have prompted those with management and/or clinical management responsibility for the Hospital at the time to take any steps, and if so, what steps and whether such steps were in fact taken;

- Whether any individual working at the Hospital or working in a post which involved responsibility for either clinical or administrative matters at the Hospital during the period in question either:

  - acted; or failed to act; or
  - omitted to act; or
  - neglected to act

in an appropriate manner in response to any such concerns or events, given their level of knowledge, seniority, experience and responsibilities at the relevant time.

Briefing Note for the Crown Prosecution Service (CPS)

CHI investigation at Gosport War Memorial Hospital

#### Status of the investigation

This investigation falls within CHIs statutory function to investigate serious potential systems failures in the NHS. Under the Commission for Health Improvement (Functions) Regulations 2000, section 11, CHI is required to carry out an investigation when required to do so by the Secretary of State. This is not a matter for discretion on the part of CHI.

CHI has recently been instructed by the Secretary of State for Health to produce a report in respect of the Gosport War Memorial Hospital. This report will address a specific term of reference. CHI has been grateful to the Department of Health for facilitating a constructive dialogue in order to shape the terms of reference, though the final wording remained with the Secretary of State.

CHI understands that the letter instructing CHI to begin this work has been signed by the Minister and is currently en route to CHI. CHI understands that the decision to make the instruction public has been placed on hold pending the CPS decision.

#### Aims and objectives

CHI will produce a written, public report which addresses the terms of reference attached at Appendix A.

The investigation will examine whether from 1989 to 1998 there had been a failure of local NHS systems to properly act upon concerns raised by patients, relatives and staff about prescribing practices or unexpected deaths at the Gosport War Memorial Hospital.

CHI's objective is to understand whether there was a failure of systems. CHI will not make any judgements regarding the outcome of any individual complaint or the conduct or ability of any former or present member of NHS staff.

#### Methodology

In order to address the term of reference, CHI will:

• Request and review documents and correspondence from the former Portsmouth Healthcare NHS Trust and previous NHS organisations responsible for the management of the Gosport War Memorial Hospital. This would include complaints correspondence, correspondence with professional organisations (eg RCN), management team minutes and

- prescribing policies. This documentary evidence has not been requested to date.
- Invite local stakeholders (such as patients and relatives) via the local media to tell CHI their views on the service between 1989 and 1998. CHI will be particularly keen to understand the systems in place for raising concerns and complaints and the outcome of such action.
- Interview present and, where possible, previous NHS staff to test out CHIs findings following the document review and stakeholder interviews. Interviewees may be accompanied during interviews, this may be by their legal representative who is not permitted to answer questions on the interviewees behalf. CHI would wish to interview staff mentioned in the "dossier" submitted recently by nurses as well as NHS managers responsible for the wards, complaints and hospital between 1989 and 1998.
- Consider whether to undertake a review of relevant case notes covering the period of the investigation.

#### **Outputs**

CHI will produce a report made publically available on the CHI website which will detail CHIs findings and recommendations.

CHI will take a non-verbatim note of each interview, which will be typed and collated via a software system.

#### Timetable

CHI would estimate that this piece of work could be completed by the Spring 2003.

Julie Miller 19 December 2002

#### Gosport War Memorial Hospital

#### Terms of reference for a further investigation by CHI

The investigation will look at whether, from 1989 to 1998, there has been a failure of local NHS systems to properly investigate and act upon concerns and complaints about standards of patient care.

CHI will take into account of the clinical audit, based on patient records, conducted by Professor Richard Baker.

The investigation will look at:

- the systems in place in the trust (and its predecessor organisations) from 1989 - 1998 to enable patients, relatives and staff to raise concerns about patient care;
- the concerns raised by patients, relatives and staff about prescribing practices or unexpected deaths from 1989 - 1998;
- the adequacy of the response to the concerns raised by patients, relatives and staff by trust managers;
- the adequacy of the trust's response to any concerns raised by professional organisations; and
- whether the management systems in place between 1989
   1998 in local NHS organisations allowed concerns to be addressed at all levels

6 January 2003

Dear Sir,

#### Gosport War Memorial Hospital

Following our meeting on 20 December 2002 I have now had a chance to consider further the potential problems which could arise from the separate enquiries which the relevant agencies will undertake.

I should stress at the outset that the CPS can only advise the police. It cannot advise other agencies. It cannot instruct anyone to take, or not to take, any particular course of action.

I cannot see that any enquiry based upon a review of the contents of the documents prepared by the hospital trusts and the CHI will in itself cause any obvious difficulty to the police enquiry provided the integrity and contents of those documents is not affected. In any event, the police cannot dictate to the other agencies how they conduct their own investigations.

It seems quite clear from our recent discussion that the agencies involved are very conscious of the potential problems, will work with the police and will take a common sense approach to overcome any difficulties.

I note the police enquiries are unlikely to be concluded until 2004 and the other agencies propose to complete their work by the spring of 2003.

I envisage that the police would find it useful to discuss with the other agencies the potential areas of conflict and difficulty which they could avoid or ameliorate when undertaking their enquiries.

The most obvious difficulty is the impact of various investigators talking to the same medical personnel, be they witnesses or potential defendants, and covering the same facts, albeit from different perspectives.

Whilst it may be impracticable to expect the other agencies to refrain from contacting any personnel, they may be encouraged to take steps to reduce the impact of their enquiry.

It would be prudent for those undertaking the non-police enquiries to ensure that the personnel to whom they talk, whether in a formal interview or not, are told of the precise nature of the particular enquiry and that it is wholly separate to the police enquiry. Obviously it is essential that no immunity from prosecution or suggestion of one, is given to the personnel in exchange for information.

A further potential difficulty could arise from the content of any report prepared by other agencies, particularly if it is made public. This is certainly the intention of the CHI Investigation. Care will be needed to ensure that such a report does not seek to apportion blame to identified individuals nor, conversely seek to specifically exonerate them. Similar principals would also apply to possible conclusions reached on 'management systems' (last term of reference in documents A to the CHI note) insofar as it could impact on any potential 'corporate liability.'

It may of course be that both agencies involved would happily agree to let the police see a draft of their respective reports in a few months time prior to publication. This may enable the police to consider more accurately whether anything in the reports is likely to impact adversely on the police investigation. Any decision to delay publication will be for the agencies concerned, but it may be possible to influence the decision, depending on the progress of the police enquiries.

I do not consider, unfortunately, that the potential problems arising in this matter can be resolved by any dogmatic legal advice. I will of course be only too pleased to advise further on any specific issues that arise. I envisage however there will be no simple or set answers. Difficulties inevitably arise where there are multi-agency enquiries into the same matter. This usually arises in 'disaster cases.' The inherent problems in those matters are worse, and often insoluble as various agencies are looking to obtain evidence to prosecute. That is not so in this case and the other agencies are seemingly wiling to assist the police in any way in which they can or at least to do nothing which would hamper the police enquiry.

I hope I have addressed the issues which you have raised. I am conscious that the police would like a 'clear steer.' However we are probably in unchartered waters and navigation will be by instinct.

Yours faithfully

Paul Close Casework Directorate

# PATIENTS AT GOSPORT WAR MEMORIAL HOSPITAL

## **OPINION**

- 1. In this matter I am instructed on behalf of Hampshire Constabulary ("the police") to advise whether any prejudice may arise to the current police investigation or in any subsequent criminal proceedings from proposed concurrent investigations by (1) the Commission for Health Improvement ("CHI"); and / or (2) an internal NHS management investigation ("NHSIMI"), into the deaths of a large number of patients at the Gosport War Memorial Hospital ("the hospital"). The police are concerned, in particular, in relation to the potential impact of the proposed interviewing of potential witnesses and / or suspects by the two bodies.
- 2. The background facts are set out in a briefing document prepared by Code A entitled "Operation Rochester", dated 27<sup>th</sup> January 2003, to which I would refer to the facts. There was also a preliminary discussion in conference on 10<sup>th</sup> January 2003.
- 3. I have been provided with the following documents from CHI and the NHSIMI:
  - ◆ A briefing note for the Crown Prosecution Service re the CHI investigation, dated 19th December 2002, by Julie Mellor.
  - A briefing note for the Crown Prosecution Service, dated 19th December 2002
     by Michael Taylor and Ed Marston.
  - ♦ A document entitled "Terms of Reference" on NHS headed paper.
  - ◆ A witness list including the names of a number of "dossier" nurses and doctors.

4. The matters under investigation relate to the period between the late 1980's and the late 1990's, and concern the routine prescription and administration of diamorphine by the use of syringe drivers to patients, many of whom were elderly but who were not terminally ill and who had simply undergone routine surgery.

#### The Proposed CHI Investigation:

5. The CHI investigation proposes to produce a written public report. The investigation will examine whether there was a failure of local NHS systems to properly act upon information provided by patients, relatives and staff about the prescribing practices and deaths over the relevant period. The CHI proposes to interview present and former NHS employees and in particular staff members mentioned in the "dossier" submitted by nurses as well as NHS managers. A non-verbatim note would be made of the interviews. The written CHI terms of reference specifies issues which are likely to be considered by the police in any investigation of gross negligence manslaughter, whether by individuals within the administration or on a corporate basis.

#### The Proposed NHS Investigation

6. The proposed NHSMI, is an internal investigation commissioned by the Hampshire and Isle of Wight Strategic Health Authority, which is itself part of the NHS. The result will be made public "....once all other investigations are completed....". It is said that the investigation will be conducted by two named NHS managers who are experienced. I do not know the terms of their employment, but I assume that they have no past or present connection with the hospital. Once again the state aims and objectives of the NHSMI are in my opinion potentially material to issues which would have to be considered by the police in any investigation of gross negligence manslaughter, whether by medical staff or individuals within the administration or on a corporate basis. Unlike the CHI, the NHSIMI intends to investigate the roles of individuals and therefore might result in the specific attribution of blame. There is a witness list of persons which the NHSIMI would seek to interview.

2

#### **Background Issues**

- 7. The first point to make is that the police investigation relates to serious offences which are potentially murder, and/or gross negligence manslaughter, against members of medical staff, and / or administrative staff. There is also the question of corporate liability. The potential offences under investigation are therefore very serious. More than 60 fatalities are being investigated. For this reason also, the case is potentially of the utmost gravity. There is a very high public interest in the investigation by the police, and any ensuing criminal proceedings being unimpeded.
- 8. Whilst previous police inquiries have not resulted in any prosecution primarily because of the absence of any robust evidence of causation, the police have now instructed professor Forrest whose preliminary opinion indicates that it is likely that causation will be established. In addition, the "dossier" nurses have subsequently come forward with further information, and there will be evidence of a statistical analysis, similar to that in the Shipman Enquiry. In these circumstances, the police consider that there is a real possibility of a prosecution resulting though of course the probabilities cannot be clearly assessed at this stage.
- 9. There has been a previous CHI investigation which reported in May 2002. The object of this previous investigation was to establish whether the current situation at the hospital was acceptable. I have not had sight of this report but I am informed that the conclusion was that whilst there had been serious problems, these were of a historical nature and that the current situation was satisfactory. It is very important to note that that inquiry concluded that there is no current risk to the public. Neither the proposed NHSIMI nor the CHI enquires are necessary to remedy any such risk at the hospital.
- 10. In my opinion, there are two main areas which might result in prejudice to criminal investigation and any resultant prosecution. These relate to (1) publicity, and (2) the interviewing of witnesses.

#### **Publicity**

- 11. It is apparent from the CHI document, that it is planned that the CHI will produce a written public report which will not to attribute individual blame, but will look at the administration of the hospital. This subject is highly relevant on the question of gross negligence manslaughter whether in relation to individuals or at a corporate level. Any report might either be highly critical of the administration, or conversely it might exculpate it. The latter might well carry express or implied criticism of medical staff even if individuals are not named. If published, this might be prejudicial to any medical staff facing gross negligence manslaughter charges.
- 12. Whilst the CHI investigation is expressly not intended to attribute blame to individuals, there may well be serious criticism of the systems in place at the time. This might prejudice a trial of any corporate charges, and /or any senior administrative staff. It might prejudice any case as to the respective culpability of an individual on one hand, and the system on the other, which would be particularly relevant in any gross negligence manslaughter charge. This is because a key element of the offence is whether any negligence was so bad as to be criminal or "gross" negligence. This may well involve considerations of the conduct of an individual in the context of the system as a whole. Any individual might wish to argue "I only did what I was told, the system is to blame". In this context exculpation of the system is potentially prejudicial.
- 13. Further, a failure of the system to act on information might well necessarily involve investigation of who provided information, when, and to whom. This likely to be a central factual issue in establishing negligence in the criminal context both at an individual and corporate level. Issues of individual responsibility and systemic failure are likely to be inextricably intertwined.
- 14. The objects of the NHSIMI expressly encompass the possibility of attribution of blame to individuals and if this were published would clearly be potentially prejudicial to a trial of any such individuals.

15. Whilst the NHSIMI is described as "internal" it is made plain in the first paragraph of the briefing note that the outcome and conclusions will be made public "once all other investigations are completed" (my emphasis). There is therefore the possibility of publication pre trial. If a report criticising the conduct of individuals who were the subject of prosecution were published there is in my opinion a clear risk of potential prejudice to those individuals in any subsequent trial.

#### **Interviewing Witnesses**

- 16. At this stage in the investigation, the police are unable to specify which witnesses they may wish to interview under caution or take witness statements from. With the exception of Dr. Barton, as far as I am aware, potential suspects have not been identified. However, even when this is clarified in due course, I cannot see that there will be a category of witnesses who will be relevant to the NHSIMI / CHI enquiries who will be irrelevant to the police investigation.
- 17. It is apparent that the police and CHI have already interviewed a number of people. Thirty-five witnesses have already been interviewed by the police, some under caution. Some are to be regarded as potential suspects. Some of the administrative staff, a number of whom have very senior positions within the NHS, are also potentially suspects/witnesses, not only in relation to the primary offences but also in relation to the corporate aspect. The main suspect is Dr Barton. Dr Barton has been interviewed by the police. She simply gave a preprepared statement. She is one of the people listed on the "witness list" whom the NHSIMI intend to interview. There are also a number of "dossier nurses" whose evidence will be central to the police investigation. Both enquiries expressly wish to interview these people. Of the 27 witnesses the NHSIMI intend to interview, only one has been interviewed by the police. Of the twenty-seven, ten have already been interviewed by the CHI. As there is a high probability that the police will also need to interview these witnesses there is a likelihood of witnesses having to undergo multiple interviews which will add to the complexity of the investigation. For this reason, it would be preferable for the police investigation

5 НРА24А1

to interview all potential witnesses with the NHSIMI and CHI enquiries in this regard postponed.

- 18. The police are concerned that there may be contamination of witnesses' evidence arising from interviews by the NHSIMI / CHI enquiries. This would depend on how the interviews were conducted. A witness's evidence can be contaminated by matters being put to them rather than being asked neutral questions. This might occur in the context of the NHS/CHI investigation. The police investigation could also be prejudiced by premature dissemination of information to suspects.
- 19. It is apparent that the precise terms of the questioning will not be recorded by CHI (the briefing document indicates that a mere "non-verbatim" note of each interview will be made). There will thus be no accurate record of what information was given to people who may well be potential suspects. It is not clear what provision will be made for this by the NHSIMI.
- 20. There is also a risk that if potential suspects are interviewed by the NHSIMI, during what is after all an internal investigation, this might taint the versions the witnesses would give in interview with the police. The NHS, or one of its subsidiary bodies, might itself be a potential suspect in relation to corporate manslaughter. Even if the NHSIMI investigators are in fact entirely impartial (and there is nothing to suggest they are not), there might be a reasonable perception of a hidden agenda. It can hardly be seen as fair for the employees of a potential suspect to have been given the opportunity to interview witnesses of primary fact, before they have been interviewed by the police, without any objection from the police. This is especially so in the context of potential gross negligence manslaughter charges, where the attribution of negligence is a central issue.
- 21. Therefore I conclude there is a risk of prejudice, and / or a perception of prejudice, arising from the interviewing of witnesses / suspects by the NHSIMI and CHI. If there is a serious concern that evidence may be contaminated there is obviously a concomitant impact in the administration of justice and a consequent risk of any

6

subsequent criminal proceedings being stayed as an abuse of process, or evidence being excluded under Section 78 of the Police and Criminal Evidence Act 1984. This is perhaps why it is normal practice for civil investigations to await the outcome of criminal investigations / proceedings. Even where it is important that civil proceedings should be dealt with swiftly and decisively, there remains a judicial discretion to delay for fear of prejudicing the fairness of criminal proceedings (see <a href="Harris-v- Crisp">Harris -v- Crisp</a> (1992) The Times, August 12 (CA) and <a href="Szczepanski-v- Szczepanski">Szczepanski -v- Szczepanski</a> [1985] FLR 468 (CA), in the context of proceedings for committal for contempt and criminal charges arising from the same incident).

- 22. Whilst the police cannot prevent the CHI or the NHSIMI interviewing witnesses, because of the risk of prejudice outlined above, in my opinion the police should request that the NHSIMI and CHI do not to interview any witnesses until (a) the police investigation has concluded and a final decision that no prosecution will take place has been reached, or (b) the conclusion of any prosecution. This request could be combined with an offer to allow access to any material obtained by the police, after the investigation or any subsequent proceedings are concluded. Once the NHSIMI and CHI have considered the documentation, agreement to this will effectively suspend their enquiries.
- 23. It has to be recognised that it is unlikely that the criminal investigation will be concluded until 2004. There is an obvious countervailing public interest in the NHS and CHI enquiries being conducted as soon as reasonably practical. For this reason it is clearly essential that the police investigation and any consequent prosecutions are dealt with as expeditiously as possible against a background of already substantial delay.
- 24. In the event that the NHSIMI and / or CHI decide to proceed, they should be requested not to make any reports public until the conclusion of any criminal proceedings or a decision not to prosecute.

Dear Code A

#### Re. Scanning of Medical Records

Further to our brief telephone conversation last week and your subsequent visit to us yesterday, I have pleasure in detailing our proposal for the archiving to CD-ROM of the documentation in question and the costs associated with your requirement.

Since your meeting with our Caroline Cowling and Ben Wilson, I have a fuller understanding of your requirements and their purpose and am therefore now able to provide exact costs rather than the general ones originally quoted verbally.

#### **Document Image Processing - Proposal**

We are proposing to scan your documents to create group 4 TIFF files and output them to CD-ROM. The documentation can be indexed to suit your requirements, usually this would be by Patient name and number and date of birth.

The retrieval and viewing software is called CDView. It has been developed by Hugh Symons, is written in Visual Basic and is supported by a MS Access database. The system can be standalone or networked and will operate on Win 95 or above including NT. The programme is completely 'open', thus allowing the simple migration of data to other document management systems in the future should this be required.

CDView software is provided **free of charge**, it can be installed on a license free basis on as many PCs as you require with installation, training, ongoing support and upgrades provided free.

All you will require for a basic installation is a current entry level PC fitted with a CD drive.

Alder Hills Park 16 Alder Hills Poole Dorset BH12 4AR Tel: 0870 849 0220 Fax 0870 849 0221

6 Temple Street Sidmouth Devon EX10 9AY Tel: 0870 849 0222 Fax: 0870 849 0223 The Parkland Business Centre Leeds Road Greengates Bradford BD10 9TQ Tel: 0870 849 0218 Fax: 0870 849 0219 A member of the Hugh Symons Group Registered in England No: 1187478 Registered address: Alder Hills Park 16 Alder Hills Poole RH12 4AR

#### **Itemised Imaging Costs**

Please find below our itemised costs for scanning your documentation.

| 1 | To colour scanning A4/A3 in duplex mode at 200dpi  | £70.00 per 1,000 images     |
|---|--|-----------------------------|
| 2 | To colour flat-bed scanning of EEG/ECG traces. (traces to be unbroken with image overlap to maintain continuity of line) | £20.00 per hour             |
| 3 | Indexing (manual keying of index data)   | £10.00 per 1,000 characters |
| 4 | Writing images and retrieval data to CD (typically 5 – 6,000 A4 colour images per CD)                                    | £35.00 per CD               |
| 5 | Provision of back-up CDs   | £25.00 per CD copy          |
| 6 | To any document preparation prior to scanning (eg. de-stapling, unfolding etc.)  | £10.00 per hour             |
| 7 | To document reconstitution after scanning  | £15.00 per hour             |
| 8 | CDView retrieval and viewing software  | Completely free of charge   |
| 9 | Secure storage of CD-ROMs (if required)  | £1.00 per CD per month      |

The above costs are exclusive of VAT.

The hardware and software we employ in the production of electronic images is designed to minimise the error rate likely to be experienced in this operation. Image production however includes a great deal of human intervention which in itself introduces the possibility for error. We will apply our usual standard of vigilance at all stages of production to achieve as near 100% accuracy as it is sensibly possible to achieve.

If you demand 100% accuracy (which may or may not be achievable), it will be necessary for each document to be checked against every images created and if this is necessary, there would be a charge of £30.00 per hour for this requirement.

We also recognise the importance of maintaining the integrity of individual documentation rather than the division or separation of pages to simplify the scanning procedure – this will again add time to the procedure which is reflected above.

I trust our costs prove to be acceptable and that we are chosen to undertake this project for you. I have included an overall cost estimate for this project as a guide but the final cost will be dictated purely by the volume and content of the records.

When you are in a position to move forward with this project or if you have any questions or queries on the foregoing, please do not hesitate to contact me.

Yours sincerely

Tom Waller

Subject: Requested Costings

Hi Code A

Following our telephone conversation please find details of costings as requested. Justin apologises for not getting back to you himself sooner but he has been involved with several meetings this afternoon.

To Scan Mixed Documents Into a Colour Format.

£ 50.00 per 1000 Images.

Document Preparation.

£ 9.50 Per Hour

Indexing Of Documents.

£ 6.95 Per 1000 images.

Master Set Cds.

£ 15.00 Per CD.

Duplicate Set Cds.

£ 10.00 Per CD.

Image Encryption and Full Text OCR.

£ Free Of Charge.

I hope you find this information of use but if I can be of any further help please do not hesitate to contact

Regards

Code A

Dear Mr Clifford

I am writing to you to inform you of a meeting that will be held at 7:30 p.m. Wednesday 5<sup>th</sup> February 2003, at the Solent Hotel and Spa, Southampton Road, Titchfield. I have enclosed a map showing the position of the Hotel.

This meeting has been organised by Alexander Harris, Solicitors and its purpose is to provide an update to all the relatives. Alexander Harris have kindly invited Officers from the Hampshire Constabulary Investigation Team to attend this meeting.

This invitation has been accepted and a number of the Investigating Officers from Operation Rochester will be present during the evening.

Whilst this event is being staged by Alexander Harris for their clients, the invitation has been extended to all families – not just those represented by that Company. I would like to stress that it is entirely a matter for you whether or not you attend this meeting. I would further emphasise that your attendance places you under no obligation whatsoever to secure the services of Alexander Harris.

During the evening it is hoped to provide an update as to the progress of the Police investigation, albeit subject to necessary investigative restraints. It will also be a good opportunity for me to meet those of you who I have not yet seen.

Yours sincerely

Mr B Page

Code A

Dear Mr Page,

#### Re: Gosport War Memorial Hospital

Thank you for your letter of the 6<sup>th</sup> February 2003. Mr Watts has asked me to reply on his behalf.

Firstly, I would like to thank you for taking the trouble to write and provide us with your feedback in respect of the meeting of 5<sup>th</sup> February. We are pleased that we were able to reassure you and the other relatives present as to our commitment to thoroughly and fairly investigate this matter.

In respect of your suggestion to consult a Nursing expert, I have to say that both Mr Watts and I took on board what you said. It struck us then that such an expert could assist massively our understanding of the medical evidence and supplement the expertise of our medical team.

Consequently, we have consulted our colleagues at the National Crime and Operations Faculty at Bramshill. They recommended a Nursing expert with, I have to say, absolutely impeccable and wide ranging credentials. I am pleased to say that this lady has agreed to join our panel of experts.

Investigations of this kind are still a relatively new phenomena for the Police to investigate. We are only too happy to accept advice from others as to the best way to move forward. Again, I would like to thank you for attending the meeting and sharing your thoughts with

us and, equally, for your very sensible suggestion in respect of commissioning a Nursing expert.

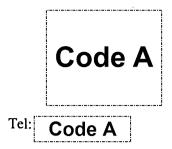

Please feel free to contact us again, either directly or through

Thursday 6th February 2003

Dear

RE: GOSPORT WAR MEMORIAL - OPERATION ROCHESTER

I would like to thank you and your team for your presentation and the opportunity to raise questions at the meeting on Wednesday evening. I can assure you that I now personally feel reassured that this case is being investigated fully and can trust in any future outcome.

May I reiterate the conversation that I had with DI Nigel Niven suggesting that you consider using the expertise of an experienced Ward Nurse/Sister to study the medical notes, in addition to the eminent professionals in their own specific fields, you intend to use. I feel that this would establish an overall picture of each case.

In my mother's case, although I have a medical background and was able to understand her medical notes, it was invaluable to me to have my daughter peruse my mother's medical notes. As a Senior Nurse Manager, she was able to give me a balanced and brief overall appraisal of the Nursing & Medical Management/Care and the Drug treatment of the case. More importantly, she was able to quickly identify and confirm areas of concern that formed the basis of my complaint.

Yours sincerely,

Copy: DI Niven

Professor B Forrest

The Medico Legal Centre Watery Street

Sheffield S3 7ET 12<sup>th</sup> February 2003

Dear Professor Forrest

# Re Operation Rochester - Gosport War Memorial Hospital

I am writing in connection to the above matter which is an investigation into a number of questioned deaths. As it would have been explained to you by members of the investigation team, our role is to thoroughly investigate these deaths and seek to establish if a crime has been committed and if so, by whom.

To that end, we have decided to draw together a team of experts to assist us to consider the complex medical issues involved. This team is to be headed by Professor Robert Forrest.

As a member of this team you are invited to attend a meeting with your fellow team members and the investigating officers. This meeting will take place over the weekend 8<sup>th</sup> and 9<sup>th</sup> March 2003 at Cheadle House, Lakeside, Cheshire. Full details of both the location and itinerary will be dispatched soon.

In brief, the purpose of the meeting will be to provide you with a number of presentations relating to the background of the case and the progress of the police investigation. In addition, you will all be provided with full copies of the relevant medical records which have been written onto DVD.

These disc's will be issued to you for the duration of the investigation. I would be grateful if you could confirm whether or not if the computer you intend to use has a DVD capability. If not, we will arrange to have one fitted at our expense. A training presentation in respect of the use of the DVD records will be provided.

In order to assist us make the necessary arrangements, I would be grateful if you could confirm that you will be able to attend the meeting and clarify whether you will need to have a DVD player installed.

I very much look forward to hearing from you in the near future.

Yours sincerely

Nigel Niven Detective Inspector
