Investigator's Notebook

CRIMINAL PROCEDURE AND INVESTIGATIONS ACT 1996.

Officers have a duty to:

| Record | Retain | Reveal | Review |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Record all information relevant to an investigation, not otherwise recorded in any form, at the time of obtaining or as soon as practicable after that time. | Retain means keeping all material obtained in a criminal investigation which may be relevant to the investigation (includes surrounding circumstances of the case) and failure to ensure this, may result in a failed prosecution. | Reveal means ensuring the CPS are aware of all material relevant to the investigation. The CPS will disclose material to the defence if in their opinion it might undermine the case against the accused. Failure to reveal material may result in a failed prosecution. | Review, there is a continuing obligation to "4R's" any material that comes to light prior to and during trial. |

These books will be issued against signature to all officers engaged on an investigation at its commencement.

At the conclusion of the investigation all books will be surrendered to the Disclosure Officer who will certify their return.

They will be filed with the case papers.

These books should record all notes made, for example:

- conference and other rough notes
- telephone numbers etc.
- notes relating to a witness i.e. statement preparation, the witness name must be linked with those notes.

To assist the Disclosure Officer, an 'S' should be placed in the margin alongside any obvious sensitive entries i.e. Informant, OP's, Police intelligence and Police/witness address/phone numbers. **NO** other document to be maintained except Pocket books, which will still record evidence.

11:34

Recommence TR:

As Quayley Mentioned

① Should you not start a patient on a particular dose of analgesic and monitor to see if this combats the pain w/o knocking them completely out.

② If it doesn't work then the medication could be reviewed and increased or changed once all of the relevant factors are known.

③ What ~~does~~ would monitor this.

④ Well it obviously wasn't going to be you so you have given the nurses carte blanche to give anything from 20-200mg and start it whenever they feel fit.

⑤ Did anyone ever query this policy Supervisors/Nurses etc

⑥ If they did what happened

GJQ/HF/25 Laminated Analgesic ladder chart

11TH July 2006.

0912

Commerce Tr: Dr. Richard Ian Reid
in presence of Solicitor Mr. Chica

Doesn't remember patient so based on records

Saw lady at RWH after hip repair.
It was clear they weren't getting back on
feet quickly. So as Consultant.

* What was she transferred to GOMH
* REHAB - What is.

Saw on 7/4 + 12/4
Died 13/4.

7/4 - Still in a lot of pain.
MPT increased
for X-ray
2" shortening of R. leg

12/4 Now very drowsy (since diazepam
transfusion) Decreased Dramorphic
Suggests she had been over sedated

* Treatment PAN.

SPOSMADIC !!!

Roanlier !!!

He would expect Barton to attend the ward every day not necessarily see each patient each day which would be impossible. Would rely on nursing staff to point her to anyone that needed her.

* It would have been helpful if she had referred to any examination i.e. chest B.Pete.

* What was her ^{medical} plan for rehab/mobilization

* Would her assessment be based solely on transfer letter or notes - or would she examine?

0955 Tape runs out. - drink of water provided.

1004 Recommence Tr.

* Do not expect a full exam if transferred you may say problem getting prev. H. notes if notes aren't with patient then surely a full examination would have to be done

1048 Tape ends

1058 Recommence Tr.

Tape Ends

0959

Recommence Tr.

Use the table

~~25~~ Perhaps should have been 45.

& then we example of start at 20 → 30 → 45 → 70

Would the nurses use the BNF?

20mg MDT / 12hr → 15mg Diamorphine / 24hr
if pain hadn't been controlled.

Then perhaps she should have been on

30mg MDT / 12hr → 20mg Diamorphine.

You're referred to British National Formulary

Barton Gross such a large range she can't have looked at the BNF.

The nurses started her on 80mg Diamorphine so can't have looked at the BNF or if they did they didn't understand it.

1041

Cause of death

Did the administration of any medication
have been minimal

If yes was that medicine appropriate

Op Rochester - Invents

The requests of + for ten of the patients at GRIM is coming to a close. The coroner is sunning up today and the jury will be sent out tomorrow. It is anticipated that they will return their verdicts Friday or Tuesday

During legal submissions yesterday the coroner made it clear that he would not let the jury return a verdict of Unlawful killing, manslaughter by gross negligence ~~or~~ neglect, or even an open verdict.

He will be asking them to decide a medical cause of death, but does not include a drug overdose, and then ~~two~~^{2/3} question

Contribute

1) Did the administration of any medication have ~~been~~ minimally or negligibly contribute to the ~~deceased~~ death of the deceased Yes/No

2)

if yes ~~was that medication necessary appropriate to according to the patients ~~and~~ symptoms~~

POC
SW
3x lab
Bulbas

IF Yes:

2) was that medication given for therapeutic purposes Yes/No

IF yes

1) was that medication appropriate

Leaving a worst case scenario of
an opioid being administered inappropriately
(excessive to the patient's needs).

All of this evidence has been supplied to
the CPS in the past and as it needed
press release has been prepared.
