Op. Rochester (4)

Issue Number

1239

Date of Issue

21st July 2005.

Officer

Code A

Rank & Number

Investigator's Notebook

CRIMINAL PROCEDURE AND INVESTIGATIONS ACT 1996.

Officers have a duty to:

Record	Retain	Reveal	Review
Record all information relevant to an investigation, not otherwise recorded in any form, at the time of obtaining or as soon as practicable after that time.	Retain means keeping all material obtained in a criminal investigation which may be relevant to the investigation (includes surrounding circumstances of the case) and failure to ensure this, may result in a failed prosecution.	Reveal means ensuring the CPS are aware of all material relevant to the investigation. The CPS will disclose material to the defence if in their opinion it might undermine the case against the accused. Failure to reveal material may result in a failed prosecution.	Review, there is a continuing obligation to "4R's" any material that comes to light prior to and during trial.

These books will be issued against signature to all officers engaged on an investigation at its commencement.

At the conclusion of the investigation all books will be surrendered to the Disclosure Officer who will certify their return.

They will be filed with the case papers.

These books should record all notes made, for example:

- conference and other rough notes
- telephone numbers etc.
- notes relating to a witness i.e. statement preparation, the witness name must be linked with those notes.

To assist the Disclosure Officer, an 'S' should be placed in the margin alongside any obvious sensitive entries i.e. Informant, OP's, Police intelligence and Police/witness address/phone numbers. **NO** other document to be maintained except Pocket books, which will still record evidence.

CP E1.20 N/R

Code A

Dr Penelope Gordon.

Code A

QAH - Ex 6416. 5302 for messages
Kay Taylor.

Married of name Jarvis.

P127 Dictated 9/9 Examined 7/9.

Gregory had

Gregory to X ray dept ~~Had~~ GWMH with wrist problem
Patients are examined by radiographers and X rayed. Consultants go from their hospitals
three times a week and examine X rays then do a report which is filed with
the patients records.

In this case as the time of wrist X ray within packet of films was
photos of hip & chest X rays done at Haslar. Haslar films taken 15/8/99.
Maybe Dr's asked for a formal report so Dr Gordon who DV dictated
P127

Gregory - looks as though (P11) she went to Haslar seen by Dr Tandy.
Fractured femur. Transferred to GWMH for continuing care.

Dr @ GWMH would have viewed the X rays. Dr Gordons expertise is in
interpretation of X rays and would later examine it for a definitive report.

Page 67
Junior Doctor
GWMH

Pain and tenderness in what we used to call the snuff box is at
the base of the thumb. ~~right~~ snuff box
V X ray right hand

As a result of this examined by X ray and Dr Gordon wrote the
definitive report.

Gregory -

INTERTROCHANTERIC means - trochanters are part of the bone (femur).
Fracture was between the two. ∴ Inter.

P127 reviewed Hadler films

Osteoporotic - thin and brittle bones.

CARPOMETACAL - Wrist made up of carpal bones

↳ Metacarpal long bones in the hand which lead to fingers.
Common site for degenerative

In view of the info Dr Gordon made specific point that there were
no bones broken other than the pelvis.

Responsible - Consultant Radiologist

May speak to

balance to require special medical nursing care as OEDM/T2DM levels are high
 risk of ketoacidosis is if there is a lot of fluid in tissues the skin becomes
 more fragile (foot ulcers) already about to break down) This is due to increased
 OEDM/T2DM according to carbon fixation and low protein.
 ii: Heart failure
 Also high risk of self neglect and injury if don't to take alcohol again.
 Needs to have 24 hour hospital care until healed am.

Page 21.

9/10/98. Is at risk. means if for risk refers to look for a suitable
 nursing home the country can be college type hospital.

Page 19.

continue Fortrop/Eutone to increase protein intake
 is Fortrop drinks in protein.

10/10 Repeat blood tests on the prescription of and tests

Page 17

On the basis of my notes I believe they illustrate that I made entries in the nursing notes reflecting the care provided and evaluation of that care, including multi disciplinary teams in engage involved the care of the patient.

~~the aim of this I do~~

~~I do not recall~~

No entry is made on 13/10/98 showing that I entered any conversation with ~~anyone regarding~~ member of the patient's family although there is no information in the notes beyond the end of page 21.

LAST

On the ward I was head of a nursing team whose duties were included the assessment, planning, and delivery and evaluation of the care of the patient. As this team leader I was responsible for this and in believe I maintained the highest possible professional standards required, in line with my Nursing and Midwifery Council Code of Professional Conduct.

Ward Rounds. If I was on duty I would go onto the ward (or next sur nurse) with the doctor and engage in conversation with the medical team (ie Consultant or SHOs) and the patient and relatives if present. This would consist of nursing feedback to the doctor as regards to the ongoing care of the patient although the final decision as to what next happened would be the doctor.

~~Ward rounds were conducted~~

CONTINUING CARE For those patients who had ongoing nursing needs. This could have been a number of things. When the patient had been admitted as an acute patient is: An older person coming in with various ~~to~~ medical conditions which could be serious or complex issues. ^{over 65 is} Dickins word.

~~When they had been stabilised (and their condition) a continuing care plan would be put in place we would begin to look @ their discharge planning in home, N.House or continuing care ward~~

Continuing care ward = somewhere where those patients with complex nursing needs could be cared for. This could be for a variety of problems however they would have needed 24hr care in a place with nurses & doctors and where they could be continuously assessed. The as to their needs prior to rehab or going on to a nursing home or deteriorate

~~There may be cases where patients~~

It has been some years since I was in a position where I had the opportunity to use continuing care wards but this is how I remember it in Portsmouth.

Nursing Def.

Care case = May be old help with personal care, dietary needs, washing etc. Might be awaiting a nursing home.

Physio, mobility, monitoring restriction and usage; pressure area relief.

Care case wards took the pressure off acute wards.

~~Care case is~~

~~The needs of a continuing care patient is less than that of a~~

The cc patient is not acutely unwell but still req's a lot of nursing care & can be quite dependant.

I have never worked in a continuing care ward.

Nomad Nurse Sloc for relatives wishing to know what going on - patient progress and for staff on the ward to advise her re patients c/care - to change in effect in charge of patient.

Also in those days there was an associate nurse, a trained member of staff who was, in fact, my deputy when I was not there.

CARE PLAN - Doc sets out for all patients coming on to the ward, their activities of daily personal needs including activity, diet etc. and is in place to ensure all members of staff are aware of those needs. Care plans are updated as and when the patient's needs change. This may be on a daily basis or otherwise depending upon the patient themselves.

*

In 1999 the practice on Dryad ward was that the ward was split in to two. I had one side and Freda Shaw had the other as 'nomad nurse'.

It may have been that when a patient was admitted I was not present - in that case another trained member of staff wrote out the care plan and my name appended as 'nomad nurse'.

In some aspects of the care plan eg: mobility I could not assess as once until I had actually observed the patient over at least 24 hours.

Full Higd. elderly med

Put simply a nursing care plan is an aid to nursing staff whether they be permanent, agency or borrowed to ensure the proper implementation of nursing care in respect of each patient

In the case of Euid Spurgin & Co

In 1999 every patient admitted to GNMH was automatically swabbed for MRSA testing, normally within the first 24 hours depending upon the time they were admitted. Nursing staff did swabs.

SWABS.

In this case I can say referring to p 32 of 175 that Euid Spurgin was swabbed axilla (under arms) and wounds. In this case by Bev Turnbull.

See page 33 is my writing 31/3/99 but misread - negative in nose, throat & groin.

A1805.

Page 80 is care sheet for a sleep nursing care plan. ie their care during sleep periods.

All of this is Bev Turnbull's writing

26/3/99 - Problem.

Desired outcome is what we want to happen to ensure if possible her well being.
