Southampton  
Hants  
SO15 2JX

Dear Detective Inspector Niven

Operation Rochester

Further to your letter of 26 September 2003 informing me that **Code A** **Code A** would be visiting family group members in connection with the above matter, I understand that the reason for these visits is to take further reports regarding Medical Reports which we understand would have been looked at by the Medical Experts when making their investigations into deaths at the hospital. If these reports are an accurate interpretation of those already given to the Police by family members and, supposedly taken into consideration by the Experts, there seems little to be gained by wasting valuable Police time by further visits unless these would mean that a signed statement from the next of kin could be made as we are not aware of what was actually included in the previous reports.

I have nothing to add to the information I gave to **Code A** when he visited me at home on Tuesday 4 February this year.

I have written this letter after discussing the matter with other members of the group as it is felt that the sooner this matter can proceed the better.

Yours sincerely,

**Code A**

D.E. Graham (Mrs.)
