Code A

Mrs. Devine's oedema is marked up to her knees. Unfortunately she had no record of her drugs with her so I was unable to change the dose of diuretics. I think her oedema would benefit from an increase. Blood pressure today was well controlled at 130/70.

I have asked her to bring her tablets with her the next time she comes to clinic so that we can be certain what dosage she is on. Her creatinine is showing a gradual rise and in July was up to 192. It has been done again today. I have given her an appointment for 2 months.

Yours sincerely
