Subject: Last 2 Rochester cases

Dear Anne

I have gone through the cases for a second time and have now come up with a grade for both but I want to run them past you before finally submitting them.

BJC 91 (an 88 year old male).

3B
3 because I could not find a clear indication for using the **Code C** and it was a high starting dose.
B because I could not find a clear cause for his death but I felt the contents of the **Code A** had probably not had long enough to significantly contribute to his death (at least the **Code A** although I suppose the **Code A** could have had an effect)

BJC 92 (an 86 year old female)

2A
2 because the starting dose of **Code A** was high although I think the use of **Code A** was not inappropriate (unless she was unconscious when it was started) A because she seemed to have **Code A** **Code A** so she had enough natural causes for her death.

Please let me know what you think so that we can submit an agreed grade for both

Best wishes
Peter
