OJK,

Please consider the issues raised by Mr Howell. Mr Watts and Mr Smith have endorsed and support our need to have this facility - we now need to resolve the matters arising from Mr Howells note. I would prefer that we discuss this in person before we frame our response.

Regards
 Nigel

Dave, am forwarding this to you as per the new process agreed by the IMB. Apart from evaluating the business case, the other two key issues you'll need to address I think are:

- 1) Will any information actually be held on the remote device (laptop)? In which case how will that be made secure?
- 2) How will training be given - the IMB decided that training should come through ITTU but I'm not sure if they are up to speed yet.

Also, any overlap with the HOLMES2 mobile data project? and will HOLMES2 run well enough over an ordinary phone line?

When you've completed your assessment please pass on to Alan's team for implementation.

Colin, Steve FYI, the IMB agreed that, because of increased and competing demands for RAS, all new requests for RAS should be routed through Corporate Services for assessment of the business justification in the same way as internet access etc.

Neil

Neil

Due to sensitivity of Business Case I have forwarded this to you.

I would strongly support application. This is an operational necessity, particularly remote access to HOLMES 2 database.

Sir,

IT Dept require your authority for RAS connection for officers.

The attached report indicates a particular and specific need in respect of OP Rochester. This facility will improve the effectiveness of the Officers in the field and will expedite enquiries.

I support the application.
