Subject: Op. Rochester

Ray,

Just a note to detail two conversations I have had with Professor Livesley.

Yesterday he rang, after faxing through his comments/questions, to add a further question which was in the back of his mind - namely,

What is the corporate responsibility for the management of the patients?
He said this may become clear later on when we have replies regarding the Pharmacy Dept. etc.

Today he rang with the following message for you -

He would have no difficulty whatsoever in supporting allegations of unlawful killing against the Doctor and any other person/persons, including nurses who were in charge of the syringe-driver. Also there may be allegations against the Ambulance Crew which would probably be supported.

His e-mail address for your information is:-

Code A

Margaret

DCI Burt

Jor,

Do we have a policy entry on the decision to treat / differentiate members of staff from GUMH as witnesses allowed to suspect - in view of the document?
