Subject: Operation Rochester

Two matters of information to update on the above.

Professor LIVESLEY has indicated that he has had a meeting with the Governments Chief Medical Officer concerning the contents of his report on Gosport War Memorial Hospital.

Dr Barton, principal focus of the enquiries, is due before a hearing at the GMC early August - the expectation at this time is that the matter will go to a full hearing to be set down for early next year - the extent of the "charges" to be notified to us once determined. It is likely that the work completed by us will be critical in this regard.

John James

Chief Superintendent
