Dear Sir or Madam

Re Dr Jane Ann Barton 1587920, registered with conditions, *Furton Medical Centre*

Could you provide me with

- 1) an audit of Dr Jane Barton death certificates, specifically in comparison to other general practitioners in her area and relative to other General Practitioners in the area.
- 2) an audit of Dr Jane Barton's prescriptions of controlled drugs both in comparison to other doctors within her practice, and with other practices within the area.

I understand concerns were first raised concerning her use of diamorphine in 1991. The interest behind this inquiry is that although her prescriptions were monitored within a hospital setting, her use of diamorphine and death certificates within the community needs equal scrutiny.

I look forward to your reply

Yours truly,

Code A

Dr Elizabeth Miller
