27<sup>th</sup> May 1999

Dear Mr Hardy,

As part of its Work Programme for 1999/2000 the Portsmouth and South-East Hampshire Community Health Council is seeking to map the provision of Respite Care services across the Health District.

The aim of this project is to identify the range of respite care facilities for each Primary Care Group and better understand the balance between NHS, Social Services and voluntary sector based provision.

CHC Members are particularly interested in respite care provision for the following groups:

1. Children
2. Elderly People
3. People with Mental Health Problems
4. People with Learning Difficulties
5. People with Chronic Illnesses
6. People with Terminal Illnesses

It would be very helpful for the CHC to receive information detailing the range of respite care services that are available to the resident population served by the Fareham and Gosport Primary Care Groups by the 16<sup>th</sup> June 1999.

The CHC would <sup>be</sup> very pleased to learn of anyone who has carried out a similar piece of work or has information that may prove helpful to our project.

Thanking you for your help in this matter.

Yours sincerely
