30/10/02 **Code A**

Call from Dr Dewhurst at St Richards Hospital Chichester. Met with [redacted] **Code A** on [redacted] Tuesday afternoon to go through medical records of late father - Mr Wilson. Asked if [redacted] had made a complaint. I explained that [redacted] was one of the relatives at the CHI press conference and had been offered the opportunity to go through his late father's records with an independent doctor by Ian Piper.

Dr D said that he was very worried about the treatment this man received. He was frail and at risk and at best would have needed a rest home when he left. As soon as he moved to GWMH he went from being on paracetamol and was started on morphine straight away. He was instantly put on a decent dose, the next day it was doubled and the day after there was a comment that he was very unwell, breathless (which would not have been surprising) the day after, he died.

Very concerned about treatment - certainly not mainstream. Sort of treatment would give if had terminal cancer.

Worried about dr prescribing and that they would do it again.

I asked if he was able to identify the dr concerned - he checked the records and said it was the same as the clerking in dr - initials JAB.

I asked how it had been left with [redacted] **Code A** - he said he had to be honest and [redacted] asked if this was the sort of treatment he would have given - he had to say that it would not have been.

He felt he had to call to let us know. I said his call was appreciated and thanked him for his honesty. He asked if there was anything further we wanted him to do. I explained that there was further information that had come to light and that this was with the police. I said I would discuss with Fiona and it may well be that he would be contacted at a later date.
