Fiona,

Have discussed with Lin, xrays not stored at Petersfield, these are returned for storage/management centrally (ie PHT) - which is where they would be destroyed.

Is this the confirmation you are seeking?

I've made some enquiries at PHT about storage/destruction of records. QAH/SMH medical records microfilmed after 3 years - service manager says no way they could stop process, they do not have storage space - but of course records not destroyed. Xrays destroyed after 5 years. I intend to tell the police this is the situation, and leave it to them to state/pressurise PHT if they want more than this

The main police focus is Gosport, and I'm told that xrays held locally in com hosps, unless there was a reason to call them back to QAH [OPD etc - not likely in any case the police might be interested in!].

Fiona/Neil could you please ensure that Com hosp medical records departments do not destroy any xrays, until the police give us the stand down.

All previous requests re. health records, death registers etc still stand.

Lesley
