Dear Dr Morgan

Code A

nee Copeland

DOB: **Code A**

Code A is registered with this Council and is the subject of a referral following an allegation of professional misconduct made against her.

In accordance with statutory regulations, the NMC has an obligation to investigate concerns about its registrants' fitness to practise being impaired. In the course of our enquiries, it has been suggested that **Code A** has a serious illness and that this led to her retiring on the grounds of ill health.

Code A has given her permission for the NMC to approach you as her general practitioner for details of her past medical history and treatment, and perhaps your opinion on her present fitness to remain on the Council's register. A copy of the consent form is enclosed. I am writing to request that you send this medical information, along with your invoice for completing the report, marked private and confidential, for my attention.

To assist you, I am seeking confirmation of the nature of her illness, its seriousness and your prognosis.

This information is required urgently and I would be grateful if you could respond by **26 February 2010**. For your convenience, a pre paid envelope is included.

Please note that the information you provide will be made available to the practitioner and will be included in any set of documents placed before the Health Committee.

The medical examiner is a completely independent Consultant Specialist appointed by the Council for the purpose of conducting an examination as described.

If you have any queries regarding this procedure please do not hesitate to contact me. I am unavailable on 22 February 2010.

Yours sincerely

Code A
