Code A**From:** Code A**Sent:** 27 April 2009 09:07**To:** Code A**Subject:** Ref: 24083/2009

Dear Ian

Gosport Inquest

Thank you for your recent letter to the NMC.

All new cases go through an initial assessment process. This includes looking at the nature of the allegations and deciding whether we need any further information from you to proceed. After the initial assessment, a case officer will write to you and guide you through the rest of the process.

The assessment process may take up to 21 days. If you have not heard from us by 27 May 2009 , please call us on Code A or email using the address shown at the top of this letter.

Yours sincerely,

Code A

Hello,

One of the family members present at the "Gosport Inquest" states that he has received information PROVING that a number of nurses lied under oath in court in regard to actions they took which resulted in un-necessary deaths.

Please confirm, by return of email, that this allegation will be investigated immediately and pursued with as much rigour as the recent case regarding under-cover filming which resulted in a nurse being struck off for doing entirely the wrong thing for entirely the right reasons.

Please further confirm that, if any evidence is found that relates to the wrongful deaths, you will pass all this evidence to the police and the Crown Prosecution Service.

--

Best regards,
 Ian

Dear Ian,

Thank you for your email. To help me identify the correct practitioner, would you mind please providing me some more information about this case i.e. the full name of the practitioner, and when this inquest happened?

Thank you and kind regards.

Hi Code A

I wrote to Ian and asked him to provide some more details about this matter and this is the response I received from him.

Many thanks.

Hello Code A

It's the one that was in the news very recently into the deaths of 10 elderly patients, which decided that several of them had been grossly over-medicated. (For example, a man who was given large quantities of diamorphine for an injury which in 85% of cases should be treated by fitting a sling and over-the-counter painkillers.)
