- 10 Have regard to the environment of care and its physical, psychological and social effects on patients/clients, and also to the adequacy of resources, and make known to appropriate persons or authorities any circumstances which could place patients/clients in jeopardy or which militate against safe standards of practice.

- 12 In the context of the individual's own knowledge, experience, and sphere of authority, assist peers and subordinates to develop professional competence in accordance with their needs.
- 13 Refuse to accept any gift, favour or hospitality which might be interpreted as seeking to exert undue influence to obtain preferential consideration.
- 14 Avoid the use of professional qualifications in the promotion of commercial products in order not to compromise the independence of professional judgement on which patients/clients rely.
