DOMICILIARY CONSULTATION

Dear Judith,

RE: GLADYS MABEL RICHARDS dob: **Code A**
Code A

Thank you very much for asking me to see Mrs Richards whom I saw this morning on Tuesday 28th November 1989. During my visit her daughter Mrs Lack was also present.

It seems that Mrs Richards is suffering from Depression of mild to moderate severity and there may be ^{an} some element of Benign Forgetfulness.

I am sure her clinical presentation is further complicated by their interpersonal relationship difficulties.

I think the best course of action here is to arrange for Mrs Richards to attend Meadowside Day Hospital for a period of four to six weeks assessment. During this period we will assess her for her daily ^{living} needs, depressive symptoms and cognitive state.

I shall contact you again in due course regarding her progress and further ~~arrangements~~ ^{at} Meadowside. I have left her with a prescription of Temazepam
