BEED DS Code A No.

Right, and the same people are present and the same things apply, still under caution as is interview and once again you're free to leave at any time or to seek the advice of Mr GRAHAM. Philip on the tape before lunch we gave you the opportunity just to read through all of the history of Mrs RICHARDS, without interruption from us and you appreciate that there's perhaps some questions that we want to ask and what we'll do now is, with your permission is perhaps just to just re-cap on that but both myself and Lee will ask a couple of questions, as and when we see relevant.

Right.

DS Code A

BEED

1.25 BEED

And pertinent to it. If I can perhaps start the clock at a point on the morning of the 11th when you first had word that Mrs RICHARDS is about to arrive at the hospital, can you take me through that, and feel free to make reference to the notes again.

Right, well we would have known erm prior to that that she was coming, we usually know of an admission at least a day in advance, so we would have had a room allocated and the bed prepared, everything in place and then the time that the patient arrives is really dependent on when the ambulance is available, so we really

	expect them any time from 9.30 in the morning
	till, should be before midday, sometimes a little
	bit after, so she would have just arrived at some
	point around midday, I can't remember now
	what time she actually arrived on the ward.
DS Code A	Okay, and she's accompanied with paperwork.
BEED	Yes.
DS Code A	And I understand in the case of Mrs
	RICHARDS on that day it was a letter from
	Doctor REID.
BEED	Yeah, the letter from Doctor REID would have
	come separately from our elderly services
	office, so we would have had that in advance of
	Mrs RICHARDS coming, so we would have
	been able to read through that ahead.
DS Code A	Is it on the notes.
BEED	The letter from Doctor REID.
DS Code A	Yeah.
BEED	It should be there. That looks to be the first half
	of it. Yeah, that's that letter there.
DS Code A	Okay, so it shows, what does that tell you about
	the patient you're receiving.
BEED	It gives, it tells us, erm, about her, this is from
	when he visit, Doctor REID visited Mrs
	RICHARDS in Haslar on the 5 th August, so that
	was 6 days before, about her history, that she's
	had a fall, is confused that he felt the
	medication had knocked her off, he'd actually
	medication had knocked her off, he'd actually

stopped the triazadom, erm, deteriorated mobility, erm, the actual incident that brought her into Haslar which was a fractured neck of femur, that she's incontinent, that's she's on Haloperidol to help with her confusion, he's said that she's clearly confused and unable to give a coherent history, erm, he found her pleasant and co-operative, moving her leg freely and lifting it, lifting the right leg from the bed and that he says he, we should give her the opportunity to try and re-mobilise and that he recommends transfer to the War Memorial and that the daughters are unhappy with care at Glen Heathers nursing home and that want to arrange for her future care to be in a different nursing home.

Okay, so that letter arrives with you, on your ward before Mrs RICHARDS.

Yeah.

So you're, so what's your expectation.

We have an overall picture from, from, from that sort of picture I would expect someone confused and with limited mobility and I would prepare, because it's from an orthopaedic ward I would prepare a single room so that we can screen and isolate MRSA bacteria, if she's carrying it, an air mattress, I would make sure it was under a hoist so we can hoist her in and out

of bed and onto a toilet if we need to, erm, and make sure, erm, and I'd know that she's, and, and, somewhere where we can keep a reasonable eye on her, it's difficult to keep an eye on all of our patients all the time but the rooms closest to the office and the nursing stations are the ones that we can most easily observe on the most frequent basis, er, in fact the room that we got ready for this lady was room 3, which is immediately adjacent to the ward office and the nursing station.

Right, so your expectation was for a lady who

was stable enough to be transferred and

DS Code A

BEED DS Code A BEED

DS

BEED

HZ042

Code A

And were any plans made on that occasion.

therefore you could make plans about.

Well we were still need to wait and see the actual person theirself to see exactly what we could do, and it usually takes the patients 2 to 3 days minimum to sort of settle into the ward so you can't really make any firm progress on rehabilitation until the patient's had a chance to settle into the ward.

So it wouldn't be upmost on your list of priorities to, to think of a plan for the future, immediately.

No, no, not until we've actually met the patient and had a few days to assess them and see how

BEED

W14 OP HZ042 ROCHESTER -CURRENT FROM TRAIN 140409 The ambulance crew would take her to room and pop her into either bed or chair depending

Okay, Mrs RICHARDS arrives at the hospital,

on how she is, I know she was in a chair that afternoon so I think we probably put her straight into a chair rather than a bed, er, we would..

Would that have been out of choice.

We would choose whichever, if the patient came laying flat on a stretcher we would probably put them into the bed, if they came onto the ward in a wheelchair we would probably put them into a chair, unless they were indicating to us, so, if, if, we want, unless they indicated to us I would rather be in a chair or I would rather be in bed.

I don't know the answer to this question, is there anywhere in the notes that indicate how she was transferred.

Erm, no there wouldn't, wouldn't be, expect, and I can, I can't remember whether I was there when she actually arrived on the ward or not, so I don't know, er, if she was transferred immediately into a chair it's likely that she actually came to us in a wheelchair but I can't, I don't know cos I can't recall and I'm not sure whether I was there or not at that time.

	DS Code A	Okay, what's your first contact with Mrs
		RICHARDS.
7.26	BEED	I would have seen her sometime after she'd
		arrived on the ward, I can't remember how soon
		but it would have been sometime between 12.15
		and 3.30, I would have gone to, and sometime
		fairly soon after she'd got there to see how she
		was and to assess her and see whether she had
		any immediate needs that she needed taking
		care of.
	DS Code A	Is there a Doctor available for admissions, I
		think you said earlier on
	BEED	Yes, we called Doctor BARTON, so we, once
		we settle the patient into the room one of the
		first things we would do is call Doctor
		BARTON actually let her know that Mrs
		RICHARDS has arrived on the ward.
	DS Code A	And what's your expectation of Doctor
		BARTON.
	BEED	Usually would come in within half an hour,
		erm, if she was actually doing something then it
		could be later than that she would usually tell us
		that, erm, and I would, I would, if there was any
		problem with the delay I would let her know, on
		this occasion I know she was in fairly promptly
		and she would come in, see Mrs RICHARDS,
		write the notes up and write the medication
		charts up.

W14 OP HZ042 ROCHESTER -CURRENT FROM TRAIN 140409 L1212

DOCUMENT RECORD PRINT

DS Code A	DS Code A	and you can tell that from the notes can you,
		that the Doctor arrived when.
	BEED	Erm, I can't tell what time she arrived, erm,
		because, except for, erm, I, I gave a dose of
		analgesia at 14.14, er, so Doctor BARTON
		must have been and gone by 2.15, because I
		couldn't have given that without the chart being
		written up.
	DS Code A	Okay, so relying on your notes there and
		message, tell me about Gladys RICHARDS,
		when you did see her.
	BEED	Very anxious, very confused, and appeared to
		be in pain from the hip that she'd had operated
		on, erm, difficult to tell exactly, what, what was
		going on because she was so confused but I, I
		felt that she was in pain and certainly very
1		difficult to communicate with.
	DS Code A	Can you distinguish between pain and
		dementia.
	BEED	It's, it's, sometimes very difficult, erm, one of
		the things that would tell us is if that, erm, the
		shouting got worse when we went to transfer
		the patient, and we would have had to do that at
		some point in the afternoon to pop her on a
		commode, if she wanted to spend a penny and,
		erm, daughter was actually saying that when
		she's agitated she want to use the toilet, so that
		would be one indication, erm, sometimes it's

1.1

RESTRICTED

DOCUMENT RECORD PRINT

very difficult to distinguish.

	very difficult to distinguish.
DS Code A	Did you have much experience of, of, erm,
	patients who have dementia.
BEED	Yeah, I have, I, all my previous posts I've look
	after patients with dementia so I've seen lots of
	patients with dementia and it presenting in all
	sorts of different ways.
DS Code A	Does it present itself in difficult grades, different severities.
BEED	Yes, yeah, you can have patients who've got
	mild dementia, erm, or dementia that's sort of
	worse at some time than others and are rational
	in between and patients who have dementia and
	are just quietly confused with it and you can
	have patients who are very noisy and very
	agitated and Mrs RICHARDS would come at
	the severe end of the scale.
DS Code A	Right, is there any doubt that that could be confused with pain.
BEED	It's difficult to differentiate but I, I, the sort of
	actions that I was seeing from Mrs RICHARDS
	and the difficulty with transferring her and so
	on indicated to me that as well dementia and
	confusion that she had pain.
DS Code A	Right, okay, does Doctor REID's letter give you
	any indication, he goes on about some drugs
	there, was it, how, Haloperidol and Trasadom,
	what do they do.

W14 OP HZ ROCHESTER -CURRENT FROM TRAIN 140409

DOCUMENT RECORD PRINT

BEED	Erm, Haloperidol is, is, erm, sedates people and
	helps the confusion, Trasadom does much the
	same things, it's a anti-depressant and, and
	helps with confusion.
DS Code A	But they're (inaudible), the Trasadom anyway.
BEED	Yeah, stopped the Trasadom, the family said
	that that, that they felt that had over sedated her,
	so, so he's actually discontinued that, and that
	had been discontinued before she came to us.
DS Code A	And that regime, I mean what he says and what
	he can see, she'd been much brighter mentally.
BEED	Yeah.
DS Code A	So perhaps there was an element of accuracy in
	their diagnosis, the family's.
BEED	Erm, certainly if you reduce the sedation then,
	then the patient is going to be more responsive,
	one of the, one of the difficulties there is that
	you may increase the risk of falling along with
	that, so that might have been one of elements in,
	in the initial prescription of Trasadom, to
	perhaps try and reduce the risk of falls.
DS Code A	Okay, but initially you see Mrs RICHARDS
	sometime between 12 and 2.15 then.
BEED	Yeah, yep.
DS Code A	That would be most likely.
BEED	Yeah.
DS Code A	And she presents herself to you and you're
a second a second second	concerned that she's in pain.

	BEED	Yeah.
	DS Code A	And you're happy that the pain outweighs the
	BEED	Confusion.
	DS Code A	The confusion and dementia.
	BEED	Yeah.
12.47	DS Code A	So what do you do next.
	BEED	I gave some analgesia, I gave, erm, 4 at 2.15
		and I gave Oramorph, I gave 10 milligrams in 5
		mils, orally.
	DS Code A	Right, to the layman is that a big dose, is that a
		small dose.
	BEED	It's a fairly small dose.
		I mean there's obviously grades of analgesia, as
	DS Code A	I understand it it's sort of aspirin is perhaps at
		the bottom end of the scale to Diamorphine at
		the opposite end, how did you gauge the
		appropriate level.
	DEED	
	BEED	It's on the amount of pain the patient is in, so
		you've got a scale from, from minor discomfort
		up to very severe pain, intolerable pain, erm,
		and you'd go on that scale, so Oramorph would
		be for more severe pain.
	DS Code A	Right, so you considered at that time that she
		was in severe pain.
	BEED	Yep.
	DS Code A	Right, would Haslar have let her go in severe
		pain.
	Mr GRAHAM	I think that's a question you should be asking
W14 OP ROCHESTER -	HZ042	L1212 Printed on: 30 June, 2009 15:59 Page 11 of 30
CURRENT FROM TRAIN 140409		
	D	ESTDICTED

RESTRICTED

DOCUMENT RECORD PRINT

the hospital.

Yeah, you'd have to ask Haslar that really.			
Right, in your experience, do Haslar send			
patients to Gosport in severe pain.			

Well, the actual transfer can cause discomfort and pain and upset patients, so that the transfer itself can be quite a difficult thing for patients, it can actually bring on pain, I have had patients transferred from Haslar who have been very poorly, erm, on numerous occasions so it wouldn't, it doesn't, it wouldn't surprise me to have a patient with me and find that they're in a lot of pain. I would expect them to be comfortable but in my experience that's not always the case.

Have you challenged Haslar about that... Yes.

.. in the past.

We always, we, we, go back through that with our Consultant, erm, because it is the Consultants who deal with the transfers, so if there's aspects of the transfer we're not happy about, erm, I talk to my Consultant, I've also memo'd my manager on several occasions when I've had a transfer which I've been unhappy about on a particular aspect and that's it, and over 3 years I've probably, I mean, there's varying degrees of being unhappy,

W14 OP HZ042 ROCHESTER -CURRENT FROM TRAIN 140409 L1212

15.00 DS Code A BEED DS Code A BEED

BEED

DOCUMENT RECORD PRINT

there's things that, that you might leave, let ride and there's things that you need to challenge and I've probably sent about 5 or 6 memos about different issues of transfers which I've not been happy about and need to be brought to Haslar's attention.

Did either of Gladys's subsequent admissions provoke you to, to write.

The fact that she was in pain, because of the fact that she'd had the hip operated on and she was very confused, that didn't actually, I, I, felt that amount of pain was appropriate to the sort of surgery she's had and her general condition. On the second transfer she was in a lot of pain when she came back and there was an issue about how she was transferred and the fact that she was on a sheet rather than a canvas, the other issues that were involved in dealing with Mrs RICHARDS and her family actually really foreshadowed worrying about whether Mrs RICHARDS should have been on a canvas when she came to us, so that wasn't something that I actually took up with Haslar at that point in time.

DS Code A

DS

BEED

Code A

W14 OP HZ042 ROCHESTER -CURRENT FROM TRAIN 140409 Okay, so quickly winding the clock back, I don't mean, I don't mean to jump from one thing to the next, Doctor BARTON sees Mrs RICHARDS prior to 2.15.

L1212

Printed on: 30 June, 2009 15:59

Page 13 of 30

RESTRICTED

DOCUMENT RECORD PRINT

	BEED	Yep.
	DS Code A	Because she needs to do the prescription.
	BEED	Yeah.
16.49	DS Code A	Have I understood that correctly.
	BEED	Yeah, yeah.
	DS Code A	So was it a shared decision to give Oramorph or
		was it your decision.
	BEED	She wasn't actually in pain at that point in time
		when she was seen by Doctor BARTON but she
		was written up for analgesia if she should
		become in pain and she did subsequently to
		Doctor BARTON leaving.
	DS Code A	So she wasn't in
	BEED	Immediately on arrival at the ward she wasn't in
		pain, it was a little while later after she'd sort of
		settle in that she was in pain.
	DS Code A	Is that unusual.
	BEED	No, not really, quite often see patients
		presenting differently when they're examined
		by a Doctor than they do half an hour, hour or
		so later, erm, for a variety of reasons.
	BEED	So Doctor BARTON sees Mrs RICHARDS,
		who isn't obviously in pain.
	BEED	At that point in time.
	DS Code A	That comes on at some point.
	BEED	Yeah.
	DS Code A	Probably over the next hour.
	BEED	Yeah.

DS Code A

BEED

Is that too fine a time.

No that's, that would probably be about right. Would she have written up a prescription for someone who wasn't in pain.

She would, cos the history of erm, erm, recently having a, a hip repaired is something that could cause pain, we, we look after quite a few patients who've had broken hips repaired and it can be quite painful, even several days postoperatively, particularly if we try to mobilise and transfer them, say getting them from chair to bed and chair to toilet and so on, so it would be appropriate for them to have analgesia should they require it.

Right, would Mrs RICHARDS have been

DS Code A

BEED

DS

DS

BEED

BEED

HZ042

subjected to much in the way of moving about.
We would need, because she didn't have catheter we would have needed to move her whenever she needed toilet and we have needed to move her to the bed and in and out the bed, so moving about but within the confines of the room at that point in time.

But she didn't go into a bed initially did she..

She was in a chair initially, yep.

So at some point it manifests itself that she's in pain.

And the prescription is already written up.

Yeah.

So you give, what you consider to be an appropriate measure relating to her condition at that particular time.

Yep.

Have I missed anything in that first bit.

Not really on the general admission, I mean we've covered the general admission here, do you know who was responsible for filling in the paperwork in terms of care plans.

Yeah that was enrolled nurse **Code A Code A** cos we're very, she came, she was on duty as well that afternoon, and I actually asked her to do the admission when she came on duty.

So it was done a little later.

Yeah, yeah.

In the afternoon.

Initially Doctor BARTON writes up her note on the 11th.

Yep.

Can you go, and refer to the notes for that.

Yep.

Now I understand that the reason for her transfer to Gosport is, how did you describe it earlier on, it's for gentle.

Assessment and gentle rehabilitation.

Gentle rehabilitation, if, can, would you mind

Printed on: 30 June, 2009 15:59

Page 16 of 30

RESTRICTED

DOCUMENT RECORD PRINT

reading that note out and telling me what that means to you.

Transfer to Daedalus ward, continuing care, the hemi-arthroplasty of her right hip on the 30th July, history, hysterectomy in 55, cataract operations, deaf, Alzheimer's, so from that, that she's, her hearing is poor and that she's confused, on examination impression frail, demented lady, not obviously in pain, please make comfortable, which is, she's not in pain at that time but if she is in pain or if her condition worsens then we should give analgesia, transfers with hoist, erm, we would have been looking at using a hoist to transfer initially and maybe try her out without the hoist and see how she got on, we have to be very aware of Health and Safety for the safety of patients, usually continent, needs help with activities of daily living, Bartel of 2 and 2, that's the index of what she can and can't do for herself.

DS Code A BEED

BEED

Who does that.

That's done by nursing staff, at that point would have been taken from the transfer information, cos we would have re-assessed the Bartel later, erm, because when we assessed it later in the day we made it to be 3 rather than 2, but, but 3 is, anything below 4 is very highly dependent. That was assuming that she was continent of

urine in fact and it made her 3, if she wasn't then she would have been below that, erm, I'm happy for nursing staff to confirm death.

22.42 DS Code A

BEED
DS Code A
BEED

To us as lay people that seems to be an awfully massive.

Statement.

Do you agree with that.

It's to do with the fact that at the War Memorial, because we don't have on call Doctors, erm, that patients conditions can worsen and nursing staff can confirm that death has taken place and then a Doctor, a Doctor actually certificates death at a later stage and the way I always interpret that is that if a patients condition worsens and I feel that they need to see a Doctor or a patient's condition worsens and they die and I need a Doctor I will call one and my staff are instructed to do likewise. Sometimes, with someone who is very elderly and frail their condition deteriorates and they die but, but, in caring for the patient you don't necessarily need the support of a Doctor, because you can see what's going on, their being seen by a Doctor doesn't mean, and it's about their care throughout their stay not just at that point in time, erm, so had Mrs RICHARDS condition deteriorated significantly that afternoon or that evening, with it being so soon

W14 OP HZ042 ROCHESTER -CURRENT FROM TRAIN 140409 L1212

Printed on: 30 June, 2009 15:59

Page 18 of 30

DOCUMENT RECORD PRINT

after admission and not expected I would have called, erm, the Doctor in, but if erm the condition worsened over the period of a few days and we'd spoken to the on call Doctor each day saying not as well as yesterday do you want to see her and what do we want to do, erm, her condition had continued to worsen and then she died in the middle of the night, erm, and we'd seen that and we'd spoken to family and it was expected we wouldn't then call a Doctor out in the middle of the night to confirm something which we'd seen happening and was known to happen.

The way it gets read by someone like me, this lady gets sent to you.

Yep.

To recover from a hip operation and then it says I'm happy for you to tell me she's dead.

I can see that, it's, it means something different to us or to me as Clinical Manager then it does to, to a lay person.

Would that be a regular entry on notes.

It would depend how the patient is, if the patient is, is, erm, obviously fit and well then no but anyone with any degree of frailty it would be, but, erm, if, but otherwise it would be left and it would be entered in at a time when the patient became poorly, if that happened, I think one of

the reasons Doctor BARTON probably does it there and then, well you'd need to speak to Doctor BARTON really as to why but there is, if it's, if it's not put in it could be then that there's a time when it needs to be written in and it's overlooked, erm, so if the lady had worsened, say over the course of the week, erm, we could then end of calling a duty Doctor in on a, on a, over a week-end for something that actually doesn't need a Doctor in, erm, because we could have seen that situation arising so it's sort of written then but not actually, erm, necessarily relevant at that point in time, it's looking at the overall likely pattern of what may happen with the patient, their condition may worsen, it may stay the same or they may get better over a period in time and obviously if the patient is getting better then it becomes a totally irrelevant statement.

Yeah, it does. Does anyone have access to those notes, can..

Not the, the medical notes, relatives can see, on request, erm, and what would, if they do request to see them, erm, it usually gets done through the elderly services office and they usually get to see them with a Doctor present to explain and help them with anything that they don't understand so that, that the meanings of things

It's still a fairly significant thing to write in someone's notes.

hours of them arriving for rehabilitation, is it, is it not.

It is, erm, but I would see it in the context of that patients overall care and the likelihood of what may or may not happen, erm, patients come to us some of them get better and some of them don't, given their overall condition.

What sort of percentage get better and what don't.

With stroke patients, and this lady wasn't a stroke patient but stroke patients it's roughly a third, a third get better and go home, a third plateau and don't do anything and a third die. I can quote those figures fairly accurately, I think probably of the continuing care patients, erm, the likelihood of getting better is slightly less.

Is it.

Yeah, but they may, they may stabilise or they might die, I couldn't give you exact figures.

Okay, right, so if, if we sort of move on a bit now then, we've got the Doctor's been, she's signed up that initial regime, she's prescribed Oramorph should it become necessary.

DOCU	JMENT RECORD PRINT
DS Code A	Mrs RICHARDS is, becomes in pain.
BEED	Yep.
DS Code A	So you prescribe Oramorph at the rate of 2.5.
BEED	Erm, I gave 10 milligrams in 5 mils.
DS Code A	And you say that's a reasonable dose because of
	the level of pain that she was experiencing
BEED	Yeah. yeah.
DS Code A	at that time.
BEED	Yep.
DS Code A	And that's the overall effect of dementia versus
	pain and, okay, do you know what effect that
	had on her.
BEED	Erm, well that kept her comfortable, erm, and
	throughout the rest of the afternoon she was
	comfortable and she certainly, at that point in
	time, wasn't over sedated.
DS Code A	Yep, can you tell me what level of sedation she
	was in, was she conscious, unconscious.
BEED	She was conscious, she was eating and
	drinking, she was communicating as much as
	she was able to do, I mean her communication
	was very poor but she was conscious and with
	us and just more settled and appeared to have
	been reasonably pain free.
DS Code A	Right, but demented never the less.
BEED	Oh yes, yeah.
DS Code A	So was there a change in the way that that

Only in that she was more settled, noticeably less agitation.

Is that a side effect of Oramorph.

Well she was on Haloperidol also, she had erm, she had Haloperidol also at 1800, so the Haloperidol and the, the Oramorph principally was to keep her pain free but it does actually relax and settle people down as well so it would have helped with her general agitation as well.

So it's just two pronged.

Yeah.

On the drug sheet there in front of you, has Doctor BARTON prescribed all of those drugs. Erm, yeah.

Is that all of those drugs on the 11th, on admission.

Erm, she's prescribed the Oramorph, she's prescribed drugs which we could give via a syringe driver on the 11th, the regular drugs, the lady was on Lactlose, Haloperidol, yeah, she's prescribed really up to there on the chart on the 11th.

So when you say up to there that's the second set of drugs down on the middle page.

Yeah, yeah, so the Lactlose, so Oramorph, Diamorphine, Hyoscine, Midazolam, Lactlose and Haloperidol have been prescribe on the 11th.

DOCUMENT RECORD PRINT

	DS Code A	Did you take that as an indication that perhaps
		she, that perhaps Doctor BARTON would be
		amenable to the use of a syringe driver that
		early.
30.53	BEED	Again, the syringe driver is something which
		often gets written up if the patient looks overall
		to be very poorly that can be used if, erm, in the
		judgement of nursing staff patient's condition
		deteriorates and that's required to keep them
		comfortable.
	DS Code A	Right, so what it is, it's an authorisation to
		proceed to that if
	BEED	If we think it's necessary.
	DS Code A	If in your judgement.
	BEED	Yeah.
31.12	DS Code A	So Doctor BARTON gives you on the 11 th the
		flexibility to adopt that regime.
	BEED	Yeah, yeah, and again, I mean if, if, Mrs
		RICHARDS condition was to worsen in the
		middle of the night it would have meant we
		could have used that without the need to call out
		a Doctor, or if we didn't, or alternatively leave
		the lady in pain overnight and not being able to
		do anything until the following morning.
	DS Code A	You mentioned she was drinking and did you
		say eating or have I imagined that.
	BEED	She was eating and drinking but only with
		assistance and her daughter came in and

actually erm fed her that evening, so, erm, she was needing help to eat and drink and it wasn't very big amounts.

Right, but her swallow reflex was fine.

Yep, yeah. The reason she wasn't eating was partly due to her confusion as much as anything.

Because she'd never been there before had she. No, no, it was a strange environment for her.

Okay, right, I don't think I've been that disjointed, we've got the 11th is, she's been seen by the Doctor, the drug regime has started, you're able to go down that syringe driver route if you feel it's appropriate but she has a swallow reflex, she can eat and drink and the family are in taking care of her. Is there anything else significant about the 11th of August, are there any things that you feel I should know about.

That was when I first met Mrs LACK, her daughter.

Tell me about that.

Just generally talked with her about how her mother was and she informed me about Glen Heathers nursing home and not being happy with that and that erm doesn't want her Mum to return there and she also said that Mum takes medicine that she takes it best off a spoon, so I've written there, she also talked to me about

the fact that she thought her Mum could communicate with her and that when she was agitated it was meant that she needed the toilet. Okay, was there any discussion about the dementia and pain angle then.

In, within erm her saying about her Mum she felt that her agitation was due to Mum needing the toilet rather than erm, rather than general confusion so having put her on the toilet when she was confused I wasn't sure that I entirely agreed that the agitation meant she wanted the toilet cos I'm, I've a recollection of putting her on the toilet when she was agitated and not actually getting any result, so, I didn't quite seem to tally with what her daughter was telling me.

Were her family aware that you'd gone onto Oramorph.

I did tell erm the daughter that I'd used Oramorph to pain, to keep comfortable..

And what was her reaction to that.

I, I really can't remember, in time.

Were you aware that she'd taken Oramorph on previous occasions.

No, don't think so.

Right, okay, has that

I would have, I would have looked back through her Haslar notes but I can't, I can't

remember.

Okay, but it's not an unusual drug.

DS Code A

W14 OP

ROCHESTER -CURRENT FROM TRAIN 140409

DS Code A	Okay, but it's not an unusual drug.
BEED	No it's a fairly common.
DS Code A	Was she sensitive to Oramorph.
BEED	Erm, well at that, Doctor, er, we actually
	continued using Oramorph to keep her pain free
	for a couple of days and actually one of my
	colleagues, staff nurse JOICE actually
	discontinued that, erm, on, erm, I think on the,
	on the 13 th or 14 th , erm, and Doctor BARTON
	at that time wrote that Mrs RICHARDS was
	quite sensitive to Oramorph.
DS Code A	Right, what does sensitive mean.
BEED	It, it has a more sedating effect on some people
	than it does on others, so, erm, and of course it
	can build up in the system a little bit so staff
	nurse JOYCE actually thought that we'd
	actually probably given a little bit too much
	pain killer to Mrs RICHARDS and it wasn't
	appropriate, the appropriate thing to do was to
	stop it at that point in time.
DS Code A	What to enable it to
BEED	To come out of her system and then review
	what we gave her in the way of pain control
	from there.
DS Code A	Okay, so what drugs did she take over the next
	couple of days, we're on the 11 th .
BEED	Yeah she had a further dose of Oramorph at
HZ042	L1212 Printed on: 30 June, 2009 15:59 Page 2
	and the second second

Page 27 of 30

DOCUMENT RECORD PRINT

1145 at night on the the 11^{th} , a further dose at 0615 in the morning on the 12^{th} , erm.

Had she been reviewed by any member of staff, had her pain lessened.

She'd, erm, what we'd have done was looked at her overall condition and, and erm, whether she was in pain and erm how the pain was, so whenever you go to give a dose of analgesia erm you look at the patient's pain and how well that's controlled and whether they, they need, so you always carry out a review before and when you're giving pain control.

So what you said earlier was that the beauty of the syringe driver is the fact that you can ensure there's constant level.

Yeah.

But with Oramorph of course it's a quick fix. Yeah and then it would wear off.

So is it recorded that on each and every occasion that the effects wore off that she needed more.

It wouldn't necessarily be recorded specifically. Is that unusual.

Erm, it wouldn't give, if I look, what I need to do is look at the night care record cos that might, erm, we haven't actually made a specific record of it but we can give, we can give the analgesia up to 4 hourly, erm, you usually do 1

or 2 things with analgesia, either you give it regularly every 4 hours without fail so that the pain doesn't come back, erm, or if you're not sure then you give the analgesia when it's required, erm, and the fact that we gave it at 0215 and it wasn't given until 1145, erm, would make, to me would give the conclusion that the staff nurse who was on duty that night actually found Mrs RICHARDS to be in pain, the analgesia having worn off and then would have given some more to settle her and keep her comfortable over night.

Yep I understand that, I mean had she been in pain at 8 o'clock in the evening you'd have been quite entitled to give her more.

I would have given her some more, yep.

But the lady in charge of her care then thought it appropriate later on, that's fine, and again in the morning.

and again in the morning, yeah.

What other drugs is she taking at this time.

At this, on, at this time, erm, Lactlose, which is to keep her bowels regular and Haloperidol which is on 1 milligram twice a day.

Printed on: 30 June, 2009 15:59

Okay, so that's not an unusual drug regime..

No.

.. for this lady.

No, no.

DS Code A	Okay, is there anything else we need to know
	about the 11 th August.
BEED	I don't, I don't think so.
DS Code A	Right, so the 12 th , you on duty on the 12 th were
	you.
BEED	Have we got the duty rotas.
DC Code A	Certainly.
DS Code A	I have them here.
DC Code A	To hand.
BEED	I know I was on duty, I can't remember what
	time I was on duty.
DS Code A	Does it help referring to the notes at all.
BEED	I think I was on duty from 0730 till 0100 but I.
DS Code A	Whilst we're looking for that, this tape is
	rapidly coming to an end, if I hit the button to
	save anyone from further embarrassment we'll
	come back in a couple of minutes, is that okay.
BEED	Yeah.
DS Code A	Right by my watch the time is 1452 and I'll turn

the tape recorder off.
