Stroke Service Timeline 1994 – 2003

KEY

Green text = Portsmouth HealthCare managed

Red text = Portsmouth Hospitals managed

Figure in brackets = age group service offered to

FSSR = fast stream stroke rehabilitation (indicator = urinary continence)

SSSC = slow stream stroke care (indicator = urinary incontinence)

PC = Portsmouth City

SEH = South East Hants

EH = East Hants

F = Fareham

G = Gosport

Notes:

- Prior to 1994 stroke patient could access in-patient rehabilitation via general rehab' wards, Jersey Ward SMH and George Ward QAH. These were set up in 1988/1989
- Kingsclere Rehabilitation Centre (37 beds) – formed from combining Jersey Ward SMH (18) and George Ward QAH (17) Rehabilitation Wards in 1994. 65-74 age strokes rehab' managed in this facility prior to lowering of age.
- F3 beds never functioned to full capacity
- Mary Ward closed Nov 1999 – March 2000
- Many of the changes were evolutionary and therefore do not have a specific development/change date
- Some of the details are from memory and may have been affected by the passage of time!
