

Stroke Service Discharge Destinations 2000/2001

Mary Ward – acute stroke beds

Yearly comparisons:

Area	1997-1998	1998-1999	1999-2000	2000-2001
Mary Ward	unavailable	211	149	*182*

** This figure *under* represents the true figure as stroke patients transferred into an acute non-stroke bed have not been identified separately.

2000-2001 Discharge Destinations:

Unfortunately this data is not available. This will be rectified for next year.

Fast Stream Stroke – Guernsey Ward

Guernsey Ward takes FSSR patients from Portsmouth City and parts of East Hants. without access to stroke beds within their locality, i.e. Hayling Island, Waterlooville, Havant.

Yearly comparisons:

Area	1997-1998	1998-1999	1999-2000	2000-2001
Guernsey Wd	180	176	181	161

Total	14	34	113	161	100%

Slow Stream Stroke

During the year the slow stream stroke areas changed their function and from January have incorporated fast and slow stream stroke patients for their area (according to the patient's home address). Elizabeth Ward retains its pure SSSC remit providing stroke care for Portsmouth City, Havant, Hayling Island and Waterlooville residents.

Yearly comparisons:
