Subject: Gosport practice lists

Dear **Code A**

Code A and yourself provided me with information about 3 practices in Gosport for the review I am undertaking. Thanks again for organising these details.

I am continuing with various analyses, and have identified a need for additional information. The spreadsheets contained the numbers of patients in the three age groups registered with each general practitioner, 1985-2002. It was great you had this information. However, it would help the analysis to categorise patients by sex as well - is the information easily available for at least some of the years in question?

I am sorry to make a further request, but the 'devil is in the detail'.

Thanks

Professor Richard Baker
