

Material relating to the investigation in Gosport

Computer files

The directories and their contents are summarised below. The heading gives the directory title.

1. emails

11 files, 572 KB. Assorted emails from 2006

2. emails a

90 files, 70 MB. This contains messages and associated materials largely relating to the planning of the investigation and the running of the investigation, including procedures for gaining ethics approval and obtaining various data files.

3. Follow up emails

14 files, 1.6MB. This directory contains emails from Department of Health and other correspondents after the review was completed and until the present; several deal with publication of the report.

4. Gosport War Memorial Hospital Report files

19 files, 2.1 MB. Various letters, most during the course of the audit.

5. Hampshire Police

5 files, 600KB. Correspondence with Hampshire police following my audit, and concerning particular cases they were investigating.

6. HES

8 files, 1.5MB. Files relating to the audit in which I attempted to compare death rates at Gosport with similar hospitals.

7. Records

15 files, 6.7MB. Files relating to the review of clinical records undertaken as part of the audit.

8. Report

25 files, 10MB. Files containing preliminary drafts of the report, and associated documents.

9. Spss

36 files, 15MB. Files containing data, held in SPSS (Statistical Package for the Social Sciences); the files contain information on death certificates, drug use, and the comparison at practice level.

Paper files

I have two box files. They contain the following:

The audit
